Important Information

Unless otherwise indicated this publication has been produced using data provided to the Department of Health and Ageing by Medicare Australia (formerly the Health Insurance Commission). The figures reported in this publication relate to the value (benefit) or volume of PBS prescriptions that have been processed by Medicare Australia. They refer only to paid services processed from claims presented by approved pharmacies. They do not include any adjustments made against pharmacists' claims, any manually paid claims or any benefits paid as a result of retrospective entitlement or refund of patient contributions.

PBS Expenditure includes the following patient categories:

- General - Ordinary
- General - Safety Net
- Concessional - Ordinary
- Concessional - Free Safety Net
- PBS Doctor's Bag

The patient category refers to the patient's eligibility status at the time of supply of the benefit. General patients hold a Medicare card, Concessional patients hold a Medicare card and one of the following cards from Centrelink:

- Pension Concession Card
- Commonwealth Seniors Health Card
- Health Care Card

There are two safety net thresholds – one for general patients and the other for concessional patients.

From 1 January 2008, the general patient safety net threshold was \$1,141.80. When patients and/or their families reached this amount, they could apply for a Safety Net Concession Card and pay only \$5.00 per prescription for the rest of the calendar year. The concessional safety net threshold was \$290.00. Once patients and/or their families reached this amount, they could apply for a Safety Net Entitlement Card and receive items free of charge for the rest of the calendar year.

The Patient Contribution, Total Cost and Average Price amounts do not include brand or therapeutic premiums.

Minor differences between the cost and volume figures reported in this publication and previous publications in this series are the result of the reprocessing of rejected claims in February 2003.

Medicare Australia introduced a new PBS claims processing system during 2005. Although all claims were paid in the required timeframes, a number of claims experienced lengthy delays in being finalised and provided to the Department of Health and Ageing after payment. This issue only occurred in certain months of the year. This has affected monthly totals during the reference period which are not necessarily prepared on a consistent basis with previous years. Therefore, caution should be exercised in interpreting monthly totals from 2005 in previous publications. Annual totals however, were not affected.

The Department of Health and Ageing has taken every care to ensure the data supplied is accurate but does not warrant that the data is error free and does not accept any liability for errors or omissions in the data.

Summary of Pharmaceutical Benefits processing, year ending 30 June 2008

Government Pharmaceutical Benefits expenditure on accrual accounting basis for the year ending 30 June 2008 totalled \$7,033.8 million, compared with \$6,428.3 million for the previous year. This is a 9.4 per cent increase. The remainder of this summary refers to Pharmaceutical Benefits Scheme (PBS) Section 85 data reported on cash accounting basis.

Total PBS prescription volumes increased by 1.6 per cent to a total of 171.3 million, compared to 168.5 million for the previous year. The growth in government expenditure compared with only a slight rise in prescription volume reflects the continuing trend of doctors prescribing newer and more expensive drugs.

Government expenditure amounted to 83.3 per cent of the total cost of PBS prescriptions. The remainder was patient contributions that amounted to \$1,189.5 million, up from \$1,151.3 million in the previous twelve-month period.

The majority of government expenditure on PBS prescriptions was directed towards concessional cardholders (\$4,699.2 million, 79.3% of the total). This is compared to concessional expenditure of \$4,401.4 million in the previous period (80.4% of the total).

The average dispensed price per prescription of PBS medicines increased to \$41.54 for the year ending June 2008 (\$39.35 for the year ending June 2007). The average government cost of these scripts was \$34.58 for the same period (\$32.50 to June 2007).

The three drugs with the highest cost to government were *Atorvastatin Calcium* (\$544.1 million), *Simvastatin* (\$221.9 million) and *Clopidogrel Hydrogen Sulfate* (\$171.2 million). PBS drugs most frequently prescribed are *Atorvastatin Calcium*, followed by *Simvastatin* and *Esomeprazole Magnesium Trihydrate*. See Table 10(b) for details.

CONC: Concessional

S/NET: Safety Net

PENSIONER: Before 1 November 1990 pensioners received PBS drugs free of charge.

NSN: Non Safety Net

S/NET 1, S/NET 2: Between 1991 and 1993 there were 2 tiers in the general safety net. Some prescriptions supplied during this period were processed in 1994 or after and the two tier structure applied to these.

MISC and SECT 100: Drugs provided through special programs and hospitals; Section 100 drugs.

HOSP & MISC: Drugs provided through special programs and hospitals; Section 100 drugs.

PENS: Before 1 November 1990 pensioners received PBS drugs free of charge.

* Data reported for MISC and SECT 100 in these years will differ from previously published data due to corrections in counting methodology

THE HIGHLY SPECIALISED DRUGS PROGRAM

Program overview

In addition to the drugs available under usual PBS arrangements, a number of drugs are also made available under alternative arrangements that are clinically appropriate.

These alternative arrangements are provided for under Section 100 (s100) of the *National Health Act 1953*. One of the programs under s100 is the Highly Specialised Drugs (HSD) Program. The Australian Government provides funding for specialised medicines under the HSD Program.

Highly Specialised Drugs are for the treatment of chronic conditions which, because of their clinical use or other specialist requirements, are restricted to supply through public and private hospitals that have appropriate specialist facilities. To prescribe these drugs as pharmaceutical benefit items, medical practitioners are required to be affiliated with these specialist hospital units.

The HSD Program is administered by the Access and Systems Branch, of the Pharmaceutical Benefits Division, while the process of selecting and reviewing drugs and procedures is the responsibility of the Highly Specialised Drugs Working Party.

Subsidy for drugs under this program commences following recommendation by the Pharmaceutical Benefits Advisory Committee (PBAC), approval by the Australian Government, and the States and Territories accepting the offer of subsidy.

To gain access to a Government funded drug under this program, a patient must attend a participating hospital and be a day admitted patient, a non-admitted patient or a patient on discharge. Government subsidy is not available for hospital in-patients and funding for any in-patient use is provided by the state in public hospitals. Patients must also be under appropriate specialist medical care, meet the specific medical criteria and be an Australian resident in Australia (or other eligible person).

A patient will be required to pay a contribution for each supply of a Highly Specialised Drug at a similar rate to the PBS.

Highly Specialised Drugs Working Party

The Australian Health Ministers' Advisory Council established the Highly Specialised Drugs Working Party in 1991. The Working Party consists of representatives from the Health Department of each of the States and Territories, the Australian Private Hospitals Association and the Commonwealth as chair.

The Working Party's terms of reference are:

- selecting drugs proposed for inclusion in the funding arrangements for highly specialised drugs;
- referring proposed drugs with supporting information to the PBAC for consideration for listing as pharmaceutical benefits under section 100 supply arrangements;
- monitoring information on potential new highly specialised drugs which might come under the funding arrangements;
- monitoring the quality use of drugs supplied under these arrangements; and
- investigating and making recommendations on procedures to monitor drugs supplied by public hospitals under the section 100 arrangements to patients in community settings.

Utilisation Based Government Expenditure on Highly Specialised Drugs

During 2007-2008 there were 78 drugs subsidised under the HSD Program, compared to 2006-2007 when 71 were subsidised. The new drug listings are:

1. Ibandronate Sodium
2. Abatacept
3. Sevelamer
4. Sitaxentan Sodium
5. Tipranavir
6. Darunavir
7. Rituximab

The Government¹ expenditure based on utilisation for 2007-2008 amounted to \$663,702,029. Drugs were categorised as follows:

<i>Indications Grouping</i>	<i>Number of Drugs</i>	<i>Public Hospital</i>	<i>Private Hospital</i>	<i>Combined</i>
Acromegaly Agents	2	\$14,276,151	\$7,157,581	\$21,433,732
Antiarthritic Agents	4	\$7,108,480	\$29,489,280	\$36,597,760
Bisphosphonate Agents	3	\$12,110,094	\$10,055,755	\$22,165,849
Haemopoietic Agents	4	\$94,362,386	\$27,863,888	\$122,226,274
Hepatitis B or C Agents	9	\$58,976,446	\$15,960,344	\$74,936,790
HIV/AIDS Antiretroviral Agents	23	\$124,640,964	\$1,292,851	\$125,933,815
Immunocompromised Conditions	10	\$8,788,695	\$1,290,358	\$10,079,053
Immunosuppressive Agents	7	\$58,900,273	\$5,152,447	\$64,052,720
Iron Overload Agents	3	\$10,880,717	\$2,852,222	\$13,732,936
Malignancy Agents	5	\$54,213,707	\$37,549,921	\$91,763,627
Other Conditions	3	\$50,296,895	\$4,322,892	\$54,619,787
Pulmonary Arterial Hypertension Agents	5	\$3,529,715	\$22,629,967	\$26,159,682
Grand Total	78	\$498,084,523	\$165,617,506	\$663,702,029

NB: Repatriation patients have been removed from Private hospital expenditure but cannot be removed from Public hospital expenditure as repatriation patients cannot be identified by public hospitals.

Government expenditure based on utilisation through the HSD program in 2006-2007 was \$588.4 million. In 2007-2008 utilisation costs totalled \$663.7 million, an increase of 12.8% from 2006-2007. At the end of the financial year, payments made to public hospitals via grants to the States and Territories are reconciled against the actual drug usage.

Australian Government expenditure for HSDs is processed through two avenues; a grant process for public hospitals and a claims payment arrangement through Medicare Australia for private hospitals. For 2007-2008 the expenditure based on utilisation in public hospitals was \$498.1 million, an increase of 7.3% from the 2006-2007 expenditure of \$464.3 million. HSD expenditure processed through Medicare Australia showed an increase of 33.4% from the \$124.1 million in 2006-2007 to \$165.6 million in 2007-2008.

The HSD Program continues to increase at a steady rate across both public and private hospitals. The increase in expenditure over the last few years is due to the increase in the number of drugs listed on the program and the increase of new private hospitals participating in the program.

PBS INFORMATION LINE REPORT, 2007-2008

The PBS Information Line, established in 1990, is an Australia-wide service which gives information on all aspects of the Pharmaceutical Benefits Scheme to the general public, health professionals, consumer groups, Ministers' and MPs' offices, and to other Government Departments and agencies.

During the period July 2007 - June 2008, the information line received **25,352** calls.

Conclusion	Number of calls	%

NATIONAL DIABETES SERVICES SCHEME (NDSS)

The National Diabetes Services Scheme (NDSS) is administered on behalf of the Australian Government by Diabetes Australia under a five year agreement. The scheme has been running since 1987 and Diabetes Australia has been the administrator through a series of agreements. The Scheme is managed by the Department through the Access and Systems Branch, Pharmaceutical Benefits Division.

The NDSS provides access to products and services needed for the self-management of diabetes at prices subsidised by the Australian Government. The products include syringes, insulin infusion pump consumables and glucose testing reagents.

The number of persons with diabetes registered with the NDSS increased by 6.37 per cent in 2007-2008 compared with 9.85 per cent for 2006-2007. Details of registrant numbers are as follows:

Number of persons with diabetes registered with NDSS						
Year	Insulin using	% change	Non insulin using	% change	Total	% change
1990-91	57,087		12,121		69,208

2007-08	275,527	7.85%	622,340	5.74%	897,867	6.37%

The chart on the following page shows the NDSS expenditure from 1992-1993 to 2007-2008.

The Government provides considerable direct support to people with diabetes through the supply of essential medicines under the Pharmaceutical Benefits Scheme and through the NDSS. In the 2007-2008 financial year, Australian Government outlays on diabetic supplies amounted to \$425.2 million, an increase of \$47 million over the previous financial year.

The Australian Government expenditure on the NDSS for the 2007-08 financial year was \$126.1 million, an increase of \$12.4 million over the previous financial year.

NATIONAL DIABETES SERVICES SCHEME Expenditure
