## TABLE 1B

### 2005 COMMUNITY PRESCRIPTION NUMBERS, TOGETHER WITH GOVERNMENT AND PATIENT COSTS FOR PBS-LISTED DRUGS

Table 1B includes an estimate of community (non-public hospital) prescription numbers for the 2005 calendar year, costs (government and patient contribution) for the items with a four digit PBS/RPBS code, together with the defined daily dose (DDD) where assigned. There is no cost information available for items with a five digit Amfac drug code. Table 1 exclude the presentation of information on any item with an estimated community use of less than 110 prescriptions in 2005.

The prescription items are arranged by ATC code on generic name, and by form and strength using either the PBS drug code (4 digit) or, for non-PBS items, the Amfac drug code (5 digit). Consult the index (page 255) by generic drug name to obtain the appropriate ATC code.

An index by 2nd level of the ATC classification follows:
