

# CLINICAL PRACTICE GUIDELINES — ANTENATAL CARE — MODULE II

Addendum No.1

Date of issue: 24 February 2015

Changes to the Clinical Practice Guidelines — Antenatal Care — Module II:

1. Delete footnote 7 on page 24 and replace with: "See the latest version of the Australian Immunisation Handbook ([www.immunise.health.gov.au](http://www.immunise.health.gov.au)) for discussion of specific vaccinations during pregnancy".
2. Delete reference to "500mg" of folic acid in Table 5.1, Section 5, page 48 and replace with "500mcg". That is, the advice on folic acid should read, "Folic acid taken preconception and in the first trimester reduces the risk of a baby having neural tube defects and a supplement of 500mcg a day is recommended."
