Hi Robyn

We've addressed all your comments/queries and removed the 'draft' watermark. Please don't hesitate to make further comment but otherwise we'll regard this as the final report.

The final hours spent on this 50 hr WO are now 52:14.

Have a great Christmas. 2013-12-20 CR351-1 fenthion OHS APVMA edits addressed.doc  
cheers

jack

**For-Official-Use-Only**

Dear Jack,

Thank you for sending this draft report on Tuesday.

I have a few comments and suggested edits which are included as track changes in the attached document. The work order is very close to being finalised- than you very much.

I would like to work towards publication of the preliminary Review Findings (including publication of this report) early in 2014 .

.....Notes on the work order.....

1. Revise the Occupational Health And Safety Assessment Of Fenthion ( First draft August 2001 revised May 2005 and Sept 2010) to:

a. Replace the following POEM assessments with suitable PHED estimates:  
DONE – thank you for incorporating the current permit uses

b. Scenario (9) Spot-on application for cattle use of surrogate cattle spot-on study  
DONE

c. Confirm whether the 117 g/L home pest control product meets the MORAG–  
DONE and the PHED assessment of this use pattern does not support the product -

d. Advise whether the Fenthion dust product is a 're-entry issue' when applied in  
domestic ceiling voids (up to 9 hours) need to mention the CEILING VOIDS,  
WALL VOIDS AND CRAWL SPACES – PDF Label attached to show the use  
patterns on this label – some may be unacceptable – if so can the report recommend  
this ?

2. Incorporate these revisions into the existing report to produce a report suitable for  
publication. DONE

.....  
Note on the track marked changes and comments – hoping that your system will happily display and  
search these.

1. – page 6 Need to clarify the acceptability or otherwise of ceiling voids, wall  
voids, crawl spaces.
2. – further down page 6 marked cracks and crevices only
3. – page 7 - Need to clarify the acceptability or otherwise of ceiling voids, wall  
voids, crawl spaces.
4. – page 23 and 24 Table 9 and text following – don't need the first 2 rows as the  
EC 117 g/L product is for spiders, ants, mosquitoes – it does not need to be included  
in this table for horticultural air blast uses
5. - page 25 and 26 Table 9 and text following – as the EC 117 g/L product is for  
spiders, ants, mosquitoes – it does not need to be included in this table for  
horticultural boom spray uses
6. - page 29 x 2 and page 31 x 2– typo - added the “n” to open
7. – page 29 in Table 15 - the description for ornamental plants has accidentally  
been copied into the 110 g/L fenthion paint table
8. – page 32 – marked where may need to clarify the acceptability or otherwise of  
ceiling voids, wall voids, crawl spaces.
9. – page 34 - Table 17 and text following – as the EC 117 g/L product is for  
spiders, ants, mosquitoes – it does not need to be included in this table for  
horticultural air blast uses
10. - page 35 - Table 18 and text following – as the EC 117 g/L product is for  
spiders, ants, mosquitoes – it does not need to be included in this table for  
horticultural boom spray uses
11. – page 37 typo – added an n to shown
12. – page 38 typo OSC for OCS
13. - page 39 x 2 and page 40 x 2– typo - added the “n” to open
14. - page 42 in Table 23 - the description for ornamental plants had accidentally  
been copied into the 110 g/L fenthion paint table.
15. – page 43 and pages following. I would like to clarify the list of crops for  
re-entry intervals. My recollection is that stonefruit are grouped in with the other  
deciduous fruits (apples, pears etc) and I would like to be sure of this so that we apply  
the correct REI for stonefruit. Also can we use the term citrus instead of grapefruit,  
lemons? – “citrus” is the crop description on the WA permit.
16. Appendix 2 – changed the tense to make it up to date – currently there are no  
approved uses in the USA that I can find.

Kind regards,

*Robyn*
