Hi Steve,

I have made changes as suggested by Amadou where appropriate, a couple of areas I have let as they were, as they are review specific and are beyond the request and scope of the WO.

Well done to Amadou in PRing his first bit of review work, caught a few issues that I had missed completely and worked out that my Cattle assessment was drastically wrong due to an initial calculation error. Since fixed and slightly weakens the support of the use pattern.

I have adjusted the recommendations to the APVMA as required.

I won't be back until the 11 Dec so if it needs to go out before that someone else will need to make any further changes.

Cheers
Rob
