History: This message has been forwarded.

Dear colleagues,

Following our previous communications concerning the manufacturer Poly Implant Prothese (PIP), including NCAR FR-2010-03-30-007, Afssaps has seized for analysis different filling gels, breast implants and raw materials in the premises of the manufacturer.

As it has been announced, the final evaluation of test results is expected by mid September after consultation of the experts including the clinicians.

A communication will be sent to all the Competent Authorities before the official Press release.

This email is sent to the "**Vigilance**" contacts and to the "**COEN**" contacts in order to reach as many people as possible.

Best regards

AFSSAPS
