**ERRATA**

**Invasive pneumococcal disease in Australia annual report, 2007 and 2008**

There was an error in the recent Invasive pneumococcal disease in Australia annual report, 2007 and 2008 published in the June issue of CDI. The data in Figure 4 was a repeat of that in Figure 5, and the correct data for Figure 4 was not published (*Commun Dis Intell* 2012;36(2):E155). The correct Figure is displayed below.

**Communicable disease surveillance – Tables**

For the issues of CDI published between June 2011 and September 2012 the data for salmonellosis; shigellosis and STEC/VTEC was incorrect in Table 3: Notification rates of diseases, by state or territory.

Please refer to the published issues on the *Communicable Diseases Intelligence* web site for the corrected data.

**Figure 4:** Notification rate for invasive pneumococcal disease, Australia, 2002 to 2008, by age group
