Data presented are as at 30 November 2022

1. Data is based on Notifications to NNDSS only up to 29 November 2022, and is not inclusive of cases determined by rapid antigen test (RAT)

2. Estimates are based on near-complete case data, the date of which varies according to the estimated delay from symptom onset to reporting. Estimates for all jurisdictions are presented from varying dates between 10 and 14 November 2022.

3. TP calculated for the Omicron BA.4/5 subvariants based off assumption of 50% case ascertainment. Final state-wide TP estimates presented are as at 12 July 2022.

4. Estimated percentage reduction in transmission due to combined impact of vaccines and infection induced immunity for the Omicron BA.4/5 subvariants based off assumption of 50% case ascertainment since December 2021 up to 9 November 2022 for all jurisdictions.

5. From 28 February 2022 the Commonwealth Government's collection methodology has changed from Case Manager input to aged care provider service self-reporting via the My Aged Care portal. This is likely to result in greater clarity regarding classification of outbreaks and case numbers which will impact on reported figures.

6. Clinical capacity indicators refer to use of clinical resources and staff and should not be used to indicate severity of illness. Values may not align exactly with other jurisdictional reporting on related metrics. Due to technical difficulties, ACT hospital occupancy data was not available between 12 and 24 November 2022.

7. From 21 January 2022, data is based on data reported to the NDIS Commission by registered NDIS providers and should be considered indicative and subject to change. NDIS-AIR data as at 1 November 2022. NDIS Worker data as at 9 October 2022.

8. Data is as at 16 August 2022 (c.f. 9 August 2022).

9. Data is as at 20 September 2022 (c.f. 13 September 2022).
