

# RADIATION ONCOLOGY HEALTH PROGRAM GRANTS SCHEME

# **APPLICATION**

For approval to facilitate transfer of ownership or control

Note: an organisation must be an approved organisation under section 40 of the *Health Insurance Act 1973* to make an application for approval of a health service under section 41.

#### **Information for Applicants**

#### **About the Scheme**

The Radiation Oncology Health Program Grants (ROHPG) Scheme provides a contribution from the Commonwealth Government towards the capital cost of high value linear accelerators (LINACs) used to provide radiation oncology services.

The Scheme is administered through the approval of health services and payment of health program grants under Part IV of the *Health Insurance Act 1973* (the Act).

ROHPGs are available to public and private radiation oncology providers.

Once an organisation has been approved by the Minister under Section 40 of the Act, it may apply for approval of a health service under Section 41 of the Act. Approval of a health service enables the payment of health program grants in relation to that health service. For the purposes of the ROHPG Scheme, an approved health service is the provision of radiation oncology services at a particular location or locations using specified radiation oncology equipment.

This application form is for use by organisations which have been approved under Section 40 of the Act to seek approval of:

**Transfer of ownership** – where an organisation seeks approval or variation of a health service to facilitate a transfer of ownership or control of all or part of an existing approved health service.

#### **Assessing Applications**

The ROHPG Guidelines provide information on the assessment criteria that apply to applications for approval of a health service. Additional information may be sought from applicants prior to a decision being made. Applicants should not assume approval will be granted.

All ROHPG applications should be either mailed or scanned and emailed to:
