

# COVID-19 outbreaks in Australian residential aged care facilities

## National snapshot

Due to the 26 January 2023 public holiday, the data period for this report is from 18 January to 24 January 2023 (inclusive).

As at 8:00 am 25 January 2023 there are 1,660 active COVID-19 cases in 291 active outbreaks in residential aged care facilities across Australia. There have been 79 new outbreaks, 44 new resident deaths and 1,409 combined new resident and staff cases reported since 18 January 2023.

**Table 1: Aged Care COVID-19 data as at 8.00am 25 January 2023<sup>1</sup>**

Category	Active <sup>2</sup>	Previous 7 days	Cumulative Total	Previous 7 days

Resident Deaths	N/A	N/A	5,045	44
Staff Cases	432	-200	79,197	403

The Department of Health and Aged Care has concluded a review and reconciliation of all data provided directly by aged care providers from early 2022.

This has resulted in retrospective adjustments to outbreaks, cases and deaths figures and an overall increase in cumulative totals. This has not affected what has been reported as occurring in the previous seven day period.

<sup>1</sup> Outbreak opening and closure includes changes in the status of exposure sites to outbreaks (and vice versa), which are applied retrospectively to facility records. New case information can also change the status of a recovered site back to an active outbreak site. As a result, changes in active outbreak status may not align with day on day variations to active totals. These adjustments will also affect the number of cases in staff and residents reported each week.

<sup>2</sup> Active residents and staff cases are the total currently positive cases in active outbreaks

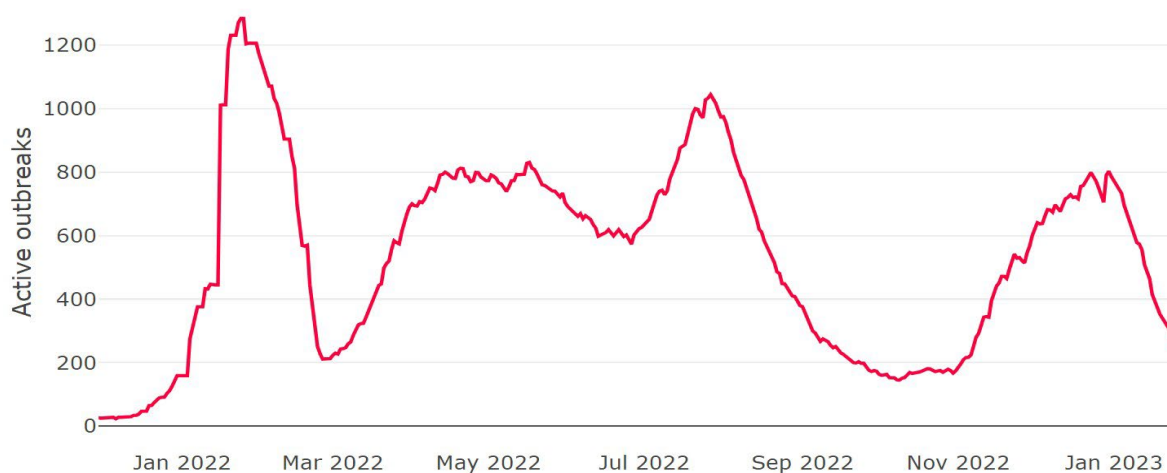

<sup>3</sup> An outbreak is considered to be active pending advice from the relevant Public Health Unit. An outbreak is defined as at least 1 positive case in a resident or 2+ cases in staff.

<sup>4</sup> Case numbers and numbers of deaths are dependent upon reporting from facilities and validation of deaths from state and territory governments. This is subject to change as further information is provided.

(ii) The large increase in outbreaks on 16 January 2022 is driven by a reporting lag.

(iii) Cases are considered active for 14 days from the date they are reported.

**Mortality**

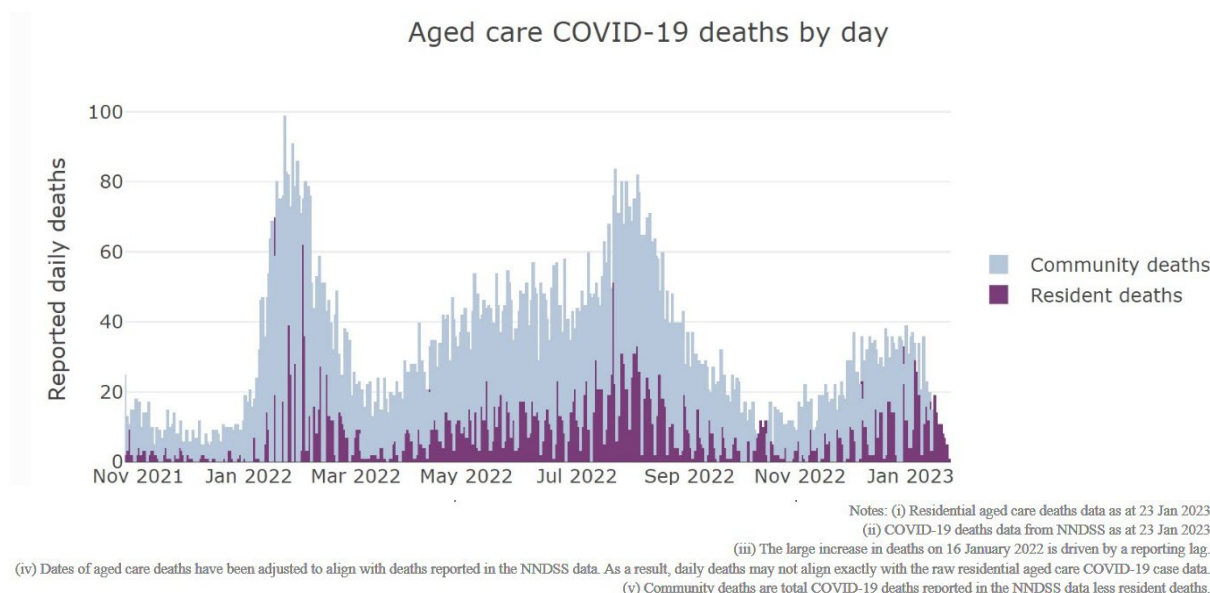

For the period of 1 January 2022 to 20 January 2023, COVID-19 is recorded as the cause of death in 6.2 per cent of all deaths in permanent residents in aged care facilities.

Since the beginning of the Omicron outbreak in late November 2021, there have been

71,437 deaths in residential aged care from all causes (report period from 29 November 2021 to 20 January 2023)<sup>5</sup>. COVID-19 deaths account for 5.8 per cent of this figure.

Over the course of the pandemic, all-cause excess mortality in Residential Aged Care was below expected numbers in 2020, and within expected range in 2021.

### Workforce in active residential aged care outbreaks

As at 25 January 2023, workforce surge staff have filled a total of 160,356 shifts in aged care services impacted by COVID-19, including 817 in the past 7 days. In the past 7 days (to 20 January) surge workforce providers have assisted 46 residential aged care homes. These shifts include roles for GPs, nurses, care workers, allied health workers, executive and ancillary staff. This includes:

**Table 3: Workforce resources supplied to residential aged care facilities**

The Australian Defence Force provided support to a total of 542 residential aged care homes between February and September 2022. The ADF deployment ceased on 30 September 2022.

### Oral antiviral treatments

Distribution of the oral anti-viral Lagevrio (Molnupiravir) commenced on 6 February 2022 to all RACFs with outbreak sites prioritised for delivery. The National Medical Stockpile has deployed 48,269 treatment courses of Lagevrio (Molnupiravir) to aged care facilities.

50,947 prescriptions for Lagevrio (Molnupiravir) have been issued to residents in residential aged care facilities, with a further 2,610 prescriptions for Paxlovid (nirmatrelvir + ritonavir) also issued since 28 February 2022 and up to 22 January 2023.

### Vaccination in Residential Aged Care Facilities

The Australian Government's COVID-19 vaccination program is delivering in-reach vaccine services for aged care residents and workers across Australia, through Commonwealth vaccine providers, primary care and self-vaccination services by aged care providers.

The Government continues to provide all residential aged care facilities with access to COVID vaccination clinics to ensure residents have every opportunity to get their fourth dose. As at 27 January 2023, there are currently 157,833 residents eligible for fourth doses. In total 134,929 residents (85.5% of eligible residents) have received a fourth dose.

As at 27 January 2023, a total of 638,067 doses of COVID-19 vaccines have been administered to residents in residential aged care facilities. Information is now received from the Australian Immunisation Register, meaning reported numbers may differ from previous reports. Information from the Australian Immunisation Register provides a more accurate representation of residents currently in residential aged care.

\* Residents who have had a fourth dose of a COVID-19 vaccine (*this may include the booster dose for severely immunocompromised residents*) total residents in Commonwealth funded positions in residential aged care facilities

\*\* Residents who have had a fourth dose of a COVID-19 vaccine (*this may include the booster dose for severely immunocompromised residents*) over total residents who have had a third dose of a COVID-19 vaccine over 3 months ago (*this may include the third primary course dose for severely immunocompromised residents*)

\*\*\* Residents who have had a fourth dose of a COVID-19 vaccine (*this may include the booster dose for severely immunocompromised residents*) over total residents who have had a third dose of a COVID-19 vaccine over 3 months ago with case overlay applied (*this may include the third primary course dose for severely immunocompromised residents*). Eligible residents have been reduced by an estimate of the number of COVID cases in the facility. The number of cases is calculated by the number of cases self-reported through AUS-CAIRS over the last 90 days adjusted by the fourth dose vaccination rate in a facility (percentage by eligible residents).

## Infection control and audits

The Aged Care Quality and Safety Commission (Commission) conducts a range of site and non-site activities to monitor and assess residential aged care services, including site audits and assessment contacts (site and non-site) (see Table 5 below). In August 2020, the Commission commenced an infection control monitoring (ICM) spot check program in all Australian jurisdictions.

The ICM spot check program involves on-site visits to residential aged care services, without an outbreak, to check compliance with personal protective equipment (PPE) and infection control arrangements. The purpose of the ICM spot check is to observe infection control practices, to ensure that staff, management and visitors were adhering to safe personal protective equipment protocols and to safe infection control arrangements as required under the quality standards.

As at 25 January 2023, the Commission had conducted 4,304 ICM spot checks to observe infection control practices and PPE protocols in residential aged care facilities.

## Appendix 1: National residential aged care services with Active outbreaks COVID-19

Please note, information reported in this table has been directly reported to the Department of Health and Aged Care by residential aged care facilities. Total cases refers to all staff and resident cases associated with the active outbreak and may not reflect the count of currently active cases. Where numbers have been incorrectly reported, facilities are able to correct these in the COVID-19 Support Portal through My Aged Care. Where a facility is reporting less than six resident or staff cases or less than six deaths, data has been suppressed to protect the privacy of affected individuals (note that “n/p” indicates data is not provided to protect privacy).
