Department of Health and Aged Care

# **ASKMBS ADVISORY**

Allied health services – Part B Mental health treatment

Updated February 2023

### A message from the Chief Allied Health Officer

Australia's 195,000 allied health professionals comprise a significant proportion of the health workforce and provide essential services in primary care generally and mental health treatment specifically. The approximately 200 million allied health MBS services provided annually are an indicator of the value of and strong demand for these services.

I would like to take this opportunity to acknowledge the continued contribution allied mental health professionals have made to supporting Australians throughout the challenges of the last few years.

The Department of Health and Aged Care's AskMBS email advice service plays a key role in assisting all providers of Medicare Benefits Schedule (MBS) services with the correct billing of MBS items. I am pleased that allied health providers are proactively seeking guidance on the policy settings and billing rules underpinning allied health MBS items. In addition to providing responses to individual enquiries, AskMBS issues regular advisories.

This is the second of two complementary AskMBS advisories on allied health MBS items. The first focussed on chronic disease management services. This issue provides information about the following allied mental health treatment issues in a Q&A format:

- 1. Bulk billing
- 2. Better Access to Psychiatrists, Psychologists and General Practitioners through the MBS (Better Access) initiative
- 3. Referrals and reports
- 4. Telehealth services
- 5. Eating disorder treatment services

I trust you will find this document useful and encourage you to continue to use AskMBS to clarify any issues arising in your practice on the correct use and billing of MBS items.

**Dr Anne-marie Boxall** Chief Allied Health Officer

### The AskMBS advice service

AskMBS is located in the Australian Government Department of Health and Aged Care. AskMBS is an email advice service providing advice to health professionals and other users of the Medicare Benefits Schedule (MBS) on the interpretation and application of MBS items, explanatory notes and associated legislation, to assist them in billing Medicare correctly.

This and other AskMBS advisories focus on a particular provider group or area of practice, and allied mental health services have been selected as the focus of this issue. Here you will find targeted advice on 'hot' topics—that is, topics on which AskMBS gets many enquiries. Future advisories will be published on a quarterly basis as well as *ad hoc*, as required.

The complete MBS, including item descriptors and explanatory notes as well as a range of related information resources, are available at: <u>MBS Online</u>.

For the sake of brevity, the abbreviation 'AMHP' is used throughout to refer to 'allied mental health professional'. In addition, the term 'Better Access' is used to refer to the Better Access to Psychiatrists, Psychologists and General Practitioners through the MBS initiative.

Note that some of the information in this advisory is necessarily broad in nature, reflecting AskMBS responses to a range of enquiries on the same issue. Please contact AskMBS at <u>askMBS@health.gov.au</u> for clarification of any specific issues.

**Disclaimer:** The information in this advisory is current and accurate as of February 2023. Medicare policy changes over time in response to a range of factors, and providers of MBS services should maintain their awareness of current policy settings and item requirements by monitoring advice issued by the Department of Health and Aged Care through channels such as direct communications and MBS Online, and by seeking clarification from AskMBS when necessary.

# 1. Bulk billing

### 1.1 Am I required to bulk bill?

You are required to bulk bill only where a mandatory bulk billing requirement applies to specified items—as was briefly the case, for example, with the COVID-19 telehealth items following their introduction. Where bulk billing is not an item requirement, a Medicare provider is not required to bulk bill and is free to set the fee they charge for a professional service. This is called private or patient billing. This allows an AMHP, for example, to charge a fee for an extended consultation which compensates them for the additional time spent.

Where a provider charges more than the Medicare rebate for a consultation (or any MBS item), the professional service cannot be bulk billed. The patient will be responsible for the difference between the rebate and the actual cost of the service. Under the principle of informed financial consent, patients should be made aware in advance of any out-of-pocket costs they may have to pay for a service.

### 1.2 When bulk billing a service, can I charge the patient an additional fee?

No. When bulk billing, a patient agrees to assign their Medicare benefit (rebate) to the provider who accepts the benefit as full payment for the service. This condition is legislated in section 20A of the *Health Insurance Act 1973*. In these circumstances the provider will receive payment directly from Medicare. If you bulk bill a patient you cannot impose additional charges for that service; for example, it is not permitted to charge a 'gap fee' that results in out-of-pocket costs to the patient.

The restriction on additional charges for a bulk billed service applies even if you use a separate invoice. No matter how the arrangement is described, if the practical effect is that you require patients to pay additional charges, then the professional service cannot be bulk billed.

For allied health services subsidised through private health insurance, many practices use payment systems such as HICAPS which allow for the patient to pay the gap between their private health cover and the cost of the service. Medicare rules do not allow the same approach for bulk billed services.

Note that patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for their allied health services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare rebate/s paid for these services.

### 2. Better Access to Psychiatrists, Psychologists and General Practitioners through the MBS (Better Access) initiative

See a full list of Better Access MBS items at Appendices A and B. Full item descriptors can be viewed by searching MBS Online for the item number at www.mbsonline.gov.au.

### For more information, see the following MBS explanatory notes which can be viewed by searching MBS Online for the note numbers.

- **MN.6.1:** Provision of psychological therapy services by clinical psychologists (items 80000 to 80021)
- MN.6.2: Psychological therapy services attracting Medicare rebates
- **MN.6.3:** Referral requirements (GPs, medical practitioners, psychiatrists or paediatricians to clinical psychologists for psychological therapy)
- MN.6.4: Clinical psychologist professional eligibility
- MN.6.5: Telehealth psychological therapy services
- MN.6.7: Provision of group psychological therapy services by clinical psychologists
- **MN.7.1:** Provision of focussed psychological strategies services by allied health providers (items 80100 to 80170)
- MN.7.2: Telehealth focussed psychological strategies services
- **MN.7.4**: Provision of group focussed psychological strategies services by allied health providers

#### 2.1 What services are available under the Better Access initiative?

Eligible patients currently have access to the following services per calendar year (1 January to 31 December):

- up to 10 individual Medicare-rebateable mental health services per calendar year for psychological therapy health services or focussed psychological strategies (FPS) services and
- up to 10 group therapy services per calendar year (involving 4–10 patients and either as part of psychological therapy or focussed psychological strategies).

In response to the COVID-19 pandemic, the number of Medicare-rebateable individual mental health services was temporarily increased from 10 to 20 until 31 December 2022. The 'additional 10' services ceased on 31 December 2022 (see 'Referrals and reports' for further information about using a referral for these services in 2023).

Individual services can include:

- face-to-face consultations; or
- telehealth (video) consultations; or
- telephone consultations; or
- a combination of face-to-face, telehealth or telephone consultations.

Patients may also access up to 10 group therapy services. These services are in addition to the entitlement to individual services.

The 10 group services can include:

- face-to-face consultations; or
- telehealth (video) consultations, for patients in Modified Monash Model (MMM) 4-7 areas only i.e. patients in rural and remote areas.

For more information on group services, see the fact sheet on MBS Online at: <u>MBS Online -</u> <u>Group Therapy MBS Changes under the Better Access Initiative</u>.

Psychological therapy health services are provided by clinical psychologists. FPS services are provided by registered psychologists, occupational therapists and social workers. FPS services can also be provided by suitably qualified medical practitioners.

A patient's allocation of individual services can be a combination of psychological therapy health services and FPS services provided either by AMHPs or medical practitioners, as clinically appropriate.

#### 2.2 Will Better Access telehealth services continue to be available?

Yes, with certain exceptions. As part of ongoing MBS telehealth arrangements, the Better Access telehealth and phone items for AMHPs initially introduced in response to the pandemic (i.e. the 911xx series items) are now permanent. The 'additional' Better Access telehealth items introduced in in response to the COVID-19 pandemic (i.e. the 933xx series items) were available until 31 December 2022 and have now ceased.

#### 2.3 What are the eligibility criteria for allied mental health professionals?

To provide Medicare services, AMHPs must be registered with Services Australia and hold a valid provider number. Specific provider eligibility criteria for the Better Access services, as set out in MBS explanatory notes MN.7.1 and MN.6.4, are:

#### Eligible clinical psychologists

A person is an allied health professional in relation to the provision of a psychological therapy health service if the person:

- a) holds general registration in the health profession of psychology under the applicable law in force in the state or territory in which the service is provided; and
- b) is endorsed by the Psychology Board of Australia to practice in clinical psychology.

#### Eligible psychologists, occupational therapists and social workers

A person is an allied health professional in relation to the provision of a focussed psychological strategies service if the person meets one of the following requirements:

- a) the person holds general registration in the health profession of psychology under the applicable law in force in the state or territory in which the service is provided;
- b) the person is a member of the Australian Association of Social Workers (AASW) and certified by AASW as meeting the standards for mental health set out in the document published by AASW titled '*Practice standards for mental health social workers 2014* as in force on 25 September 2014;
- c) the person:
  - i. is an occupational therapist who is registered as a person who may provide that kind of service under the applicable law in force in the State or Territory in which the service is provided; and
  - ii. is accredited by Occupational Therapy Australia as:
    - having a minimum of two years' experience in mental health; and

• having undertaken to observe the standards set out in the document published by the Occupational Therapy Board of Australia's *Australian occupational therapy competency standards 2018*, and the *National practice standards for the mental health workforce 2013* as in force on 1 January 2022.

### 2.4 What are the patient eligibility requirements for Better Access services?

To be eligible, a patient must have:

- A referral from a medical practitioner (including a GP, but not a specialist or consultant physician) as part of a GP Mental Health Treatment Plan (MHTP);
- A referral from a medical practitioner (including a GP, but not a specialist or consultant physician) who is managing the patient under a referred psychiatrist assessment and management plan; or
- A referral from a psychiatrist or paediatrician using an eligible psychiatric or paediatric service.

An AMHP must be in receipt of a referral when providing the first service in that course of treatment.

The conditions classified as mental disorders for the purposes of the Better Access services are informed by the World Health Organisation, 1996, Diagnostic and Management Guidelines for Mental Disorders in Primary Care: ICD-10 Chapter V Primary Care Version. For the purposes of these items, dementia, delirium, tobacco use disorder and mental retardation are not regarded as a mental disorder.

If there is any doubt about a patient's eligibility, Services Australia can confirm whether an MHTP, and/or a psychiatrist assessment and management plan is in place and claimed, or an eligible psychiatric or paediatric service has been claimed, as well as the number of Better Access services already accessed by the patient during the calendar year.

AMHPs can contact Services Australia on the Medicare Provider Enquiry Line (13 21 50) or medicare.prov@servicesaustralia.gov.au to check this information.

### 2.5 What are the strategies approved for use when providing focussed psychological strategies services?

The following are acceptable strategies that have been approved for use in providing FPS services:

1. Psycho-education (including motivational interviewing)

#### 2. Cognitive-behavioural therapy including:

- 2.1 Behavioural interventions
- -Behaviour modification
- -Exposure techniques
- -Activity scheduling

#### 2.2 Cognitive interventions

-Cognitive therapy

#### 3. Relaxation strategies

-Progressive muscle relaxation

-Controlled breathing

#### 4. Skills training

-Problem solving skills and training

- -Anger management
- -Social skills training
- -Communication training
- -Stress management
- -Parent management training
- 5. Interpersonal therapy (especially for depression)
- 6. Narrative therapy (for Aboriginal and Torres Strait Islander people)

#### 7. Eye-movement desensitisation reprocessing

### 2.6 Can patients in residential aged care facilities (RACFs) access Better Access?

The expanded eligibility for aged care residents under Better Access, through GP referral, ceased on 31 December 2022. Aged care residents can continue to access Better Access services if they are referred by a psychiatrist, consistent with pre-pandemic arrangements and eligibility requirements.

## 3. Referrals and reports

## 3.1 Is there a difference between a mental health treatment plan and a referral?

Yes. A GP mental health treatment plan (MHTP) is a structured framework for GPs to undertake the management of patients with clinically diagnosed mental disorders. A referral is a separate document described in section 4.2.

Practitioners should provide a copy of the MHTP to the AMHP along with the referral form.

There is no fixed time limit on an MHTP. Many patients will not require a new plan after their initial plan has been prepared. As MHTPs do not expire, patients may still be referred for further mental health services for as long as the referral is consistent with what is in the MHTP and the referring practitioner has determined that further services are required.

### 3.2 What information needs to be included in a referral before I accept it?

There is no standard form for allied mental health referrals. The referral should be in writing (signed and dated by the referring practitioner) and include:

- the patient's name, date of birth and address;
- the patient's symptoms or diagnosis;
- a list of any current medications;
- the number of sessions the patient is being referred for (the 'course of treatment');
- a statement about whether the patient has an MHTP or a psychiatrist assessment and management plan; and
- a statement about whether the referral can be used for group therapy or individual therapy.

A referral should include all of these details, to assist with any auditing undertaken by the Department of Health and Aged Care. For the same reason, it is a legislative requirement that the AMHP retain the referral for 2 years (24 months) from the date the service was rendered.

Please note if a referral does not specify whether the referral is for individual or group therapy, the patient can use a referral to access either individual or group therapy treatment option. It would however be best practice for the patient to speak to their referring practitioner if they intend to use a referral for group therapy services, because this is important information that may help inform the referring practitioner's future decisions regarding their treatment.

A referring practitioner can verbally refer a patient for Better Access services only if:

- in their clinical judgement they consider it is necessary for the patient to have immediate access to support from an AMHP, and
- it is not practicable in the circumstances to provide a written referral for example, to do so would cause delays in treatment to the patient's detriment, and
- the AMHP documents in writing that they are treating the patient based on the referring practitioner's verbal referral, and
- the referring practitioner provides a written referral to the AMHP as soon as possible afterwards.

While waiting for the referring practitioner to provide a written referral, the AMHP can provide treatment according to the verbal referral until the referred number of sessions have been completed. If there is any doubt about the number of sessions the patient was verbally referred for, the AMHP should follow the guidance provided below under section 3.3 – 'Does a referral for Better Access services have to specify the number of services being referred?'.

A verbal referral <u>does not</u> replace the requirement for the referring practitioner to review the patient's progress (taking into account the written report from their AMHP) after each course of treatment.

AMHPs are not obliged to accept a referral about which they have concerns and should contact the referring practitioner for clarification where there is any doubt about the intent or content of the referral. Clarification of any ambiguity could be provided in the form of an amended referral, via email, or by other correspondence. It may also be possible to obtain this confirmation verbally and to record this within the patient notes.

### 3.3 Does a referral for Better Access services have to specify the number of services being referred?

A referral for Better Access services <u>should</u> specify the number of sessions a patient is being referred for. Specifying the number of sessions helps to:

- ensure the AMHP can treat the patient in line with their clinical need, as assessed by the referring practitioner;
- provide certainty and clarity for both patients and AMHP in relation to the course of treatment to be delivered; and
- support the practitioner to manage the patient's care within their annual allocation of sessions.

#### Where an AMHP receives a referral that:

- Does not specify the number of sessions
- Specifies a number of sessions above the maximum allowed for the course of treatment, or
- Specifies a number of sessions above the maximum allowed for the calendar year (including any sessions the patient has already received that year)

### The AMHP can use their clinical judgment to provide services under the referral, noting the patient cannot receive more than:

- the maximum number of sessions allowed for that particular course of treatment (as set out below), and
- the maximum number of sessions allowed in a calendar year.

In these circumstances, the AMHP must provide a report at the end of a course of treatment in line with standard practice for these services. This enables the referring medical practitioner to consider the treating practitioner's report on the services provided to the patient, and the need for further treatment.

The maximum number of sessions allowed in a calendar year for each course of treatment is as follows:

- Initial course of treatment a maximum of 6 sessions.
- Subsequent course/s of treatment a maximum of 6 sessions up to the patient's cap
  of 10 'initial' sessions. For example, if the patient received 6 sessions in their initial
  course of treatment, they can only receive 4 sessions in a subsequent course or
  courses of treatment.

If the patient reaches the maximum number of sessions allowed in a calendar year during a course of treatment, the AMHP can continue to use the referral to complete the course of treatment the following calendar year – where clinically appropriate.

Where the patient's maximum allocation is unknown, providers may contact Services Australia on the Medicare Provider Enquiry Line (13 21 50) or <u>medicare.prov@servicesaustralia.gov.au</u> to confirm the patient's remaining allocation of services.

#### 3.4 Does a patient need a new referral each calendar year?

If the patient has a current referral (either for the 'initial' (pre-COVID) 10 sessions or the additional 10 sessions which ceased on 31 December 2022) and has not used all of those sessions, they can use that referral to access sessions in the next calendar year. Sessions provided after 31 December 2022 under a referral for additional sessions should be billed using the appropriate initial items numbers (i.e. the 800xx / 911xx items). These sessions would be subject to the usual requirements applying to initial sessions e.g. no more than 6 sessions in a single course of treatment. The patient cannot receive more than 10 individual sessions each year. MBS items available for Better Access sessions are listed in <u>Appendix A</u>.

#### 3.5 What are the reporting requirements for Better Access services?

AMHPs who perform psychological therapy health services or FPS services under the Better Access initiative must provide a report back to the referring practitioner after each course of treatment. This report will help the referring practitioner consider the patient's need for further sessions.

If a patient does not complete treatment, the AMHP should write a report after the last service provided. If the patient returns later and completes the course of treatment, another report should be completed and provided to the referring practitioner.

Furthermore, it is considered best practice to send a report to the referring practitioner when clinically indicated–that is, if there is a significant change in the patient's condition or the treatment approach. A report must be written and include:

- assessments carried out on the patient;
- treatment provided; and
- recommendations on future management of the patient's disorder.

A verbal review and/or report is not sufficient. Further information about the reporting requirements relating to these services can be accessed in MBS explanatory notes MN.6.2 and MN.7.1, available by searching MBS Online for the note number at www.mbsonline.gov.au.

# 3.6 Where a referral names an allied mental health professional, can the patient choose to see someone else? Does the patient have to see the same provider for all services under the referral?

Where a referral states the name of a specific AMHP, there is no legislative barrier preventing a patient from changing to a different AMHP, either before or during a course of treatment. A copy of the referral should be given to the patient to take to the new AMHP.

However, it would be best practice for the patient to make an appointment to speak to their referring practitioner, where they do choose to change AMHP during a course of treatment, as this is important information that may help inform the referring practitioner's future decisions regarding a patient's treatment.

Any new AMHP should check the number of services the patient has already received with Services Australia (on 13 21 50) or <u>medicare.prov@servicesaustralia.gov.au</u> so they can ensure compliance with the legislative requirement that a patient be reviewed by the referring practitioner following the completion of the course of treatment.

## 4. Telehealth services

See a full list of Better Access MBS items at Appendices A and B. Full item descriptors can be viewed by searching MBS Online for the item number at www.mbsonline.gov.au.

For more information, see the following MBS explanatory notes which can be viewed by searching MBS Online for the note number.

- MN.6.5: Telehealth psychological therapy services
- MN.7.2: Telehealth focussed psychological strategies services

#### 4.1 What are the requirements for the ongoing telehealth items?

All Medicare-eligible persons other than admitted hospital patients can receive these services.

For the purposes of the ongoing telehealth items, a telehealth attendance means a professional attendance by video conference where the health practitioner:

- (a) has the capacity to provide the full service through this means safely and in accordance with professional standards; and
- (b) is satisfied that it is clinically appropriate to provide the service to the patient; and
- (c) maintains a visual and audio link with the patient; and
- (d) is satisfied that the software and hardware used to deliver the service meets the applicable laws for security and privacy.

A telephone attendance means a professional attendance by telephone where the health practitioner:

- (a) has the capacity to provide the full service through this means safely and in accordance with professional standards; and
- (b) is satisfied that it is clinically appropriate to provide the service to the patient; and
- (c) maintains an audio link with the patient.

No specific equipment is required to provide Medicare-compliant telehealth services. AMHPs must ensure that their chosen telecommunications solution meets their clinical requirements and does not conflict with any obligations under the *Privacy Act 1988* and the Australian Privacy Principles Guidelines established under section 28(1)(a) of this Act. To assist providers with their privacy obligations, a privacy checklist for telehealth services has been made available on MBS Online at:

 $\frac{www.mbsonline.gov.au/internet/mbsonline/publishing.nsf/Content/Factsheet-TelehealthPrivChecklist.$ 

Further information can be found on the <u>Office of the Australian Information Commissioner</u> <u>website</u> and the <u>Australian Cyber Security Centre website</u>.

### 4.2 Can I use a phone service even if the patient and I have the capacity to videoconference?

Videoconference services are the preferred substitute for a face-to-face attendance. However, providers are also able to offer audio-only (i.e. phone) services, where they have deemed it clinically appropriate. There are separate items available for audio-only services.

# 4.3 What are the differences between the pre-COVID telehealth services and the ongoing telehealth services?

All Medicare-eligible Australians, regardless of location, can access Better Access services via telehealth, where safe and clinically appropriate. The same limits with respect to the number of services available in a calendar year apply to these services. Existing individual telehealth and phone attendance items, introduced in response to COVID-19, will continue to be available to AMHPs. These items are set out below:

Service	Video items	Telephone items
	Clinical psychologists	
Attendance lasting more than 30 minutes but less than 50 minutes	91166	91181
Attendance lasting at least 50 minutes	91167	91182
	Psychologists	
Attendance lasting more than 20 minutes but less than 50 minutes	91169	91183
Attendance lasting at least 50 minutes	91170	91184
Attendance lasting more than 20 minutes but less than 50 minutes	91172	91185
Attendance lasting at least 50 minutes	91173	91186
	Social workers	
Attendance lasting more than 20 minutes but less than 50 minutes	91175	91187
Attendance lasting at least 50 minutes	91176	91188

#### 4.4 Group therapy via telehealth

There are a number of items for the provision of group psychological therapy health services (PT) and focussed psychological strategies (FPS) services via videoconference to improve access to services for people in rural, remote and very remote locations (see Appendix B).

Geographic eligibility for these services is determined according to Modified Monash Model (MMM) classifications. Telehealth eligible areas are within MMM classifications 4 to 7, and patients must be located in such an area at the time of the service. Patients and providers are able to check patient eligibility using the MMM locator on the Department of Health and Aged Care's website at: <a href="https://www.health.gov.au/internet/otd/publishing.nsf/Content/MMM\_locator">www.health.gov.au/internet/otd/publishing.nsf/Content/MMM\_locator</a>.

While there are no restrictions on the AMHP's location, there is also a requirement that the patient and AMHP be located a minimum of 15 kilometres apart at the time of the service, as measured by the most direct route by road. The patient or AMHP is not permitted to travel to an area outside the minimum 15 kilometre distance in order to claim a video attendance item when using these items. Additionally, it should be noted that these items are for video attendances only; these items cannot be used for telephone attendances.

### 5. Eating disorder treatment services

For more information, see the following MBS explanatory notes which can be viewed by searching MBS Online for the note number at www.mbsonline.gov.au:

- MN.16.1: Eating disorders–General explanatory notes
- MN.16.3: Eating disorders-Psychological treatment (EDPT) services

### 5.1 What allied mental health items are patients with an eating disorder eligible for?

Once patients have a valid eating disorders treatment and management plan (EDP) in place, they are eligible for up to 40 eating disorder psychological treatment (EDPT) services (and up to 20 dietetic services) for 12 months from the date the EDP is finalised. An EDP must be completed by a medical practitioner in general practice, a GP, paediatrician or psychiatrist. Once an EDP is in place it is valid for 12 months. A patient must have a valid EDP in order to access EDPT services.

To ensure an integrated, team-based approach to care, the patient must be reviewed by their managing medical practitioner after each course of EDPT treatment (i.e. after 10, 20, 30 EDPT services). The patient must also be reviewed by a psychiatrist or paediatrician before they can have more than 20 EDPT services. For the purposes of EDPT items a course of treatment is defined as the number of services requested in the referral to a maximum of 10 services.

For the purposes of counting a patient's allocation of EDPT services, services provided under the following items are included: 90271, 90272, 90273, 90274, 90275, 90276, 90277, 90278, 90279, 90280, 90281, 90282, 2721, 2723, 2725, 2727, 283, 285, 286, 287, 371, 372 and items in Groups M6, M7 and M16 (excluding items 82350 and 82351). Note that if any services are provided to a patient using the Better Access items after the EDP is in place, these services are counted towards the patient's allocation of EDPT services.

Any 'unused' EPDT services from a patient's allocation under one EDP cannot be carried across to a new EDP developed for that patient. After 12 months, if the patient continues to meet the eligibility criteria and the managing practitioner is of the opinion that the patient would continue to benefit from a comprehensive approach to the treatment of their eating disorder, a new EDP can be developed. This will enable the patient to claim 40 EDPT services in the following 12-month period.

The items for EDPT services are restricted to AMHPs who are eligible to provide services under the Better Access initiative.

#### 5.2 What is an eating disorder psychological treatment service?

A range of acceptable treatments has been approved for use by professionals in this context. The approved treatments are:

- Family-based treatment for eating disorders (EDs), including whole family, parent-based therapy, and parent-only or separated therapy
- Adolescent-focussed therapy for EDs
- Cognitive behavioural therapy for EDs (CBT-ED)
- CBT-anorexia nervosa (AN) (CBT-AN)
- CBT for bulimia nervosa (BN) and binge-eating disorder (BED) (CBT-BN and CBT-BED)
- Specialist supportive clinical management (SSCM) for EDs

- Maudsley model of anorexia treatment in adults (MANTRA)
- Interpersonal therapy (IPT) for BN, BED
- Dialectical behavioural therapy (DBT) for BN, BED
- Focal psychodynamic therapy for EDs

Health professionals are expected to practice within their scope of practice and provide services in which they have received adequate training.

### 5.3 Can a patient with an eating disorders treatment plan also have a GP mental health treatment plan?

It is preferable that wherever possible patients have only one plan for primary care management of their disorder. Once a patient has a claim for an eating disorder treatment and management plan (EDP), the patient should not have a claim for the development or review of a mental health treatment plan (MHTP) within the following 12 months, unless there are exceptional circumstances or the managing practitioner is of the opinion that the patient no longer meets the eligibility criteria for the eating disorder items.

However, if a patient has an MHTP but subsequently meets the eligibility criteria for the EDP items, they can have an EDP as well. Any services provided under the Better Access items (including psychological therapy and focussed psychological strategies (FPS) services) prior to the date of the EDP will <u>not</u> count towards the patient's allocation of 40 eating disorder psychological treatment (EDPT) services. Any services provided under Better Access <u>after</u> the EDP is developed will count towards the patient's allocation of 40 EPDT services.

If the patient no longer meets the eligibility criteria for the eating disorder items, and the practitioner is of the clinical opinion that the patient should be managed under the standard MHTP arrangements, then the patient can access psychological therapy and FPS services under the relevant items. Any psychological therapy or FPS services that were provided in the calendar year prior will count towards the patient's allocation of Better Access services, but any services provided under the EDPT items will not count towards the allocation of Better Access services.

Further information on EDPs and their interaction with other treatment plans can be found on the Services Australia education guide at:

www.servicesaustralia.gov.au/organisations/health-professionals/topics/education-guideeating-disorder-treatment-and-management-plans/51726.

### 5.4 What are the reporting requirements for eating disorder psychological treatment services?

As with Better Access services, AMHPs providing eating disorder psychological (EDPT) services are required to provide the referring medical practitioner with a written report after each course of treatment on assessments carried out, treatment provided and recommendations for future management of the patient's condition.

One difference between the EDPT and Better Access requirements is that a report is required <u>after the first service</u>, as clinically required following subsequent services, and after the final service in a course of treatment. For the purposes of EDPT items a course of treatment is defined as the number of services requested in the referral to a maximum of 10 services.

Written reports should include, at a minimum:

- any investigations, tests, and/or assessments carried out on the patient;
- any treatment provided; and
- future management of the patient's condition or problem.

### Appendix A–Better Access services for patients in the community

Item No.	Service Type	Service length (mins)
<u>80000</u>	Face to face (consultation rooms)	30-50
<u>80005</u>	Face to face (call-out)	30-50
<u>80001</u>	Telehealth (geographic eligibility applies)	30-50
<u>91166</u>	COVID-19 telehealth (video)	30-50
<u>91181</u>	COVID-19 (phone)	30-50
<u>80010</u>	Face to face (consultation rooms)	50+
<u>80015</u>	Face to face (call out)	50+
<u>80011</u>	Telehealth (geographic eligibility applies)	50+
<u>91167</u>	COVID-19 telehealth (video)	50+
<u>91182</u>	COVID-19 (phone)	50+
<u>93335</u>	Phone	50+

### Psychological therapy services by clinical psychologists

#### Focussed psychological services by registered psychologist

Item No.	Service Type	Service length (mins)
<u>80100</u>	Face to face (consultation rooms)	20-50
<u>80105</u>	Face to face (call out)	20-50
<u>80101</u>	Telehealth (geographic eligibility applies)	20-50
<u>91169</u>	COVID-19 telehealth (video)	20-50
<u>91183</u>	COVID-19 (phone)	20-50
<u>80110</u>	Face to face (consultation rooms)	50+
<u>80115</u>	Face to face (call out)	50+
<u>80111</u>	Telehealth (geographic eligibility applies)	50+
<u>91170</u>	COVID-19 telehealth (video)	50+
<u>91184</u>	COVID-19 (phone)	50+

### Focussed psychological services by occupational therapists

Item No.	Service Type	Service length (mins)
<u>80125</u>	Face to face (consultation rooms)	20-50
<u>80130</u>	Face to face (call out)	20-50
<u>80126</u>	Telehealth (geographic eligibility applies)	20-50
<u>91172</u>	COVID-19 telehealth (video)	20-50
<u>91185</u>	COVID-19 (phone)	20-50
<u>80135</u>	Face to face (consultation rooms)	50+
<u>80140</u>	Face to face (call out)	50+
<u>80136</u>	Telehealth (geographic eligibility applies)	50+
<u>91173</u>	COVID-19 telehealth (video)	50+
<u>91186</u>	COVID-19 (phone)	50+

Item No.	Service Type	Service length (mins)
<u>80150</u>	Face to face (consultation rooms)	20-50
<u>80155</u>	Face to face (call out)	20-50
<u>80151</u>	Telehealth (geographic eligibility applies)	20-50
<u>91175</u>	COVID-19 telehealth (video)	20-50
<u>91187</u>	COVID-19 (phone)	20-50
<u>80160</u>	Face to face (consultation rooms)	50+
<u>80165</u>	Face to face (call out)	50+
<u>80161</u>	Telehealth (geographic eligibility applies)	50+
<u>91176</u>	COVID-19 telehealth (video)	50+
<u>91188</u>	COVID-19 (Phone)	50+

### Focussed psychological services by social workers

### Appendix B–Better Access group therapy services

Provider	Item no.	Mode of delivery	Service length
Clinical psychologist	80020	In person	60+ minutes
Clinical psychologist	80021	Telehealth*	60+ minutes
Clinical psychologist	80022	In person	90+ minutes
Clinical psychologist	80023	Telehealth*	90+ minutes
Clinical psychologist	80024	In person	120+ minutes
Clinical psychologist	80025	Telehealth*	120+ minutes
Psychologist	80120	In person	60+ minutes
Psychologist	80121	Telehealth*	60+ minutes
Psychologist	80122	In person	90+ minutes
Psychologist	80123	Telehealth*	90+ minutes
Psychologist	80127	In person	120+ minutes
Psychologist	80128	Telehealth*	120+ minutes
Occupational therapist	80145	In person	60+ minutes
Occupational therapist	80146	Telehealth*	60+ minutes
Occupational therapist	80147	In person	90+ minutes
Occupational therapist	80148	Telehealth*	90+ minutes
Occupational therapist	80152	In person	120+ minutes
Occupational therapist	80153	Telehealth*	120+ minutes
Social worker	80170	In person	60+ minutes
Social worker	80171	Telehealth*	60+ minutes
Social worker	80172	In person	90+ minutes
Social worker	80173	Telehealth*	90+ minutes
Social worker	80174	In person	120+ minutes
Social worker	80175	Telehealth*	120+ minutes

\*Limited to patients located in Modified Monash Model area 4-7.
