

# The best time for **pregnant** women to get **vaccinated** is now

Women who are pregnant, planning to get pregnant, or breastfeeding can get the Comirnaty (Pfizer), Nuvaxovid (Novavax) and Spikevax (Moderna) COVID-19 vaccines now.

**There is a high risk of pregnant women and their unborn baby getting very sick from COVID-19.**

To best protect you and your unborn baby, keep up to date with your COVID-19 vaccinations as recommended for your age and health needs.

For more information, have a yarn with your healthcare worker, visit [health.gov.au](https://www.health.gov.au), or call **1800 020 080**.
