

# COVID-19 outbreaks in Australian residential aged care facilities

## National snapshot

As at 8:00 am 13 April 2023 there are 2,043 active COVID-19 cases in 302 active outbreaks in residential aged care facilities across Australia. There have been 157 new outbreaks, 33 new resident deaths and 1,782 combined new resident and staff cases reported since 6 April 2023.

<sup>1</sup> Outbreak opening and closure includes changes in the status of exposure sites to outbreaks (and vice versa), which are applied retrospectively to facility records. New case information can also change the status of a recovered site back to an active outbreak site. As a result, changes in active outbreak status may not align with day on day variations to active totals. These adjustments will also affect the number of cases in staff and residents reported each week.

<sup>2</sup> Active residents and staff cases are the total currently positive cases in active outbreaks

<sup>3</sup> An outbreak is considered to be active pending advice from the relevant Public Health Unit. An outbreak is defined as at least 1 positive case in a resident or 2+ cases in staff.

<sup>4</sup> Case numbers and numbers of deaths are dependent upon reporting from facilities and validation of deaths from state and territory governments. This is subject to change as further information is provided.

**Mortality**

For the period of 1 January 2022 to 13 April 2023, COVID-19 is recorded as the cause of death in 5.5 per cent of all deaths in permanent residents in aged care facilities.

Since the beginning of the Omicron outbreak in mid December<sup>5</sup> 2021, there have been 80,963 deaths in residential aged care from all causes (report period from 15 December 2021 to 10 April 2023)<sup>6</sup>. COVID-19 deaths account for 5.4 per cent of this figure.

Over the course of the pandemic, all-cause excess mortality in Residential Aged Care was below expected numbers in 2020, and within expected range in 2021.

<sup>5</sup> The Omicron outbreak start date has been redefined from late November 2021 to mid December 2021. Changes have been made to align reporting with the start date of Omicron published in the Department’s external facing Epidemiology report.

<sup>6</sup> The Department is now accessing aged care deaths data from the SIEBEL dataset. Figures are live and subject to change. Source: Department of Health and Aged Care unpublished data / SIEBEL dataset.

### Workforce in active residential aged care outbreaks

As at 14 April 2023, workforce surge staff have filled a total of 166,951 shifts in aged care services impacted by COVID-19, including 740 in the past 7 days. In the past 7 days (to 13 April) surge workforce providers have assisted 31 residential aged care homes. These shifts include roles for GPs, nurses, care workers, allied health workers, executive and ancillary staff. This includes:

**Table 3: Workforce resources supplied to residential aged care facilities**

Workforce provider	Total Shifts	Previous 7 days
Recruitment, Consulting and Staffing Association	102,398	330
Healthcare Australia (Workforce Surge)	13,701	6
Healthcare Australia (NACER)	2,295	N/A
Mable	2,711	N/A
Aspen Medical	22,353	106
HealthX	19,437	298
Torrens	4,056	N/A

The Australian Defence Force provided support to a total of 542 residential aged care homes between February and September 2022. The ADF deployment ceased on 30 September 2022.

### Oral antiviral treatments

Distribution of the oral anti-viral Lagevrio (Molnupiravir) commenced on 6 February 2022 to all RACFs with outbreak sites prioritised for delivery. The National Medical Stockpile has deployed 48,269 treatment courses of Lagevrio (Molnupiravir) to aged care facilities.

57,713 prescriptions for Lagevrio (Molnupiravir) have been issued to residents in residential aged care facilities, with a further 3,571 prescriptions for Paxlovid (nirmatrelvir + ritonavir) also issued since 28 February 2022 and up to 9 April 2023.

## Vaccination in Residential Aged Care Facilities

People living in residential aged care homes remain a high priority for the Government's COVID-19 vaccination program, with ongoing targeted support and communications to maintain the high level of vaccination within this group.

During 2023, COVID-19 vaccines continue to be administered in residential aged care homes by primary care providers. The Department of Health and Aged Care is working with Primary Health Networks to support residential aged care homes that may need assistance with facilitating COVID-19 vaccinations.

The 2023 COVID-19 vaccine booster program has moved away from dose numbers and focusses on ensuring protection for aged care residents is topped up if it has been more than 6 months since the last immunising event (an infection or a vaccine dose), regardless of the number of doses. At the beginning of the program in February 2023, nearly one third of aged care residents were not immediately eligible for a 2023 booster, as they had a vaccine dose or infection in the last 6 months.

As at 13 April 2023, there were:

- 59,118 (33.1% of total) aged care residents estimated with a vaccine dose or infection in the last 6 months, and hence not currently eligible for a COVID-19 2023 booster dose.
- 17,754 (13.9% of estimated eligible) aged care residents with a COVID-19 2023 booster dose.

The estimated eligible population is made up of residents who have completed their COVID-19 primary course, and had their last COVID-19 vaccine dose or infection more than 6 months ago. As residential aged care populations are fluid, and case overlay is not exact, eligible populations for vaccination are an estimate only.

**Table 4: Aged Care COVID-19 2023 Booster Doses (data as at 13 April 2023)**

## Infection control and audits

The Aged Care Quality and Safety Commission (Commission) conducts a range of site and non-site activities to monitor and assess residential aged care services, including site audits and assessment contacts (site and non-site) (see Table 5 below). In August 2020, the Commission commenced an infection control monitoring (ICM) spot check program in all Australian jurisdictions.

The ICM spot check program involves on-site visits to residential aged care services, without an outbreak, to check compliance with personal protective equipment (PPE) and infection control arrangements. The purpose of the ICM spot check is to observe infection control practices, to ensure that staff, management and visitors were adhering to safe personal protective equipment protocols and to safe infection control arrangements as required under the quality standards.

As at 13 April 2023, the Commission had conducted 4,620 ICM spot checks to observe infection control practices and PPE protocols in residential aged care facilities.

## Appendix 1: National residential aged care services with Active outbreaks COVID-19

Please note, information reported in this table has been directly reported to the Department of Health and Aged Care by residential aged care facilities. Total cases refers to all staff and resident cases associated with the active outbreak and may not reflect the count of currently active cases. Where numbers have been incorrectly reported, facilities are able to correct these in the COVID-19 Support Portal through My Aged Care. Where a facility is reporting less than six resident or staff cases or less than six deaths, data has been suppressed to protect the privacy of affected individuals (note that “n/p” indicates data is not provided to protect privacy).
