COVID-19 Vaccine Rollout

Total COVID-19 vaccine doses

Australia's COVID-19 Vaccine Program

Data as at: 12 Apr 2023

65+

4,422,866

individuals aged 65 and over have received a vaccination

18+

19,590,342

individuals aged 18 and over have received a vaccination

5-17

2,639,682

individuals aged 5 to 17 have received a vaccination

65,991,753

total vaccine doses administered

+135,518 weekly increase

NSW 20,462,758 +41,408 weekly increase VIC 17,164,837 +35,461 weekly increase

QLD 12,428,778 +25,020 weekly increase WA 7,140,589 +13,511 weekly increase

TAS 1,508,286 +3,838 weekly increase

SA 4,624,227 +10,115 weekly increase

ACT 2,031,971 +5,753 weekly increase

NT 630,307 +412 weekly increase

Please note that a person's COVID-19 infection history cannot be linked to their vaccination records at this time, which means eligibility estimates and population coverage rates are not available. State breakdown is based on the state in which a vaccine was physically administered, and may differ from a person's residential address.

COVID-19 2023 Booster Doses

Australia's COVID-19 Vaccine Program

Data as at: 12 Apr 2023

Total 2023 Booster Doses administered (18+)

1,341,333

2023 Booster Doses administered by age group

65+ 50-64 836,308 285,896 30-49 18-29 158,259 60,870

Note: number of Booster Doses is not the same as number of people.#

Number of people by time since last vaccination by age

	Less than six months	Six or more months ago	Unvaccinated##
65+	978,674	3,444,192	<500
50-64	505,983	4,024,594	96,509
30-49	370,399	6,457,880	243,263
18-29	120,400	3,688,220	218,696

Number of 2023 Booster Doses administered by provider state###

Provider State	2023 Booster Doses (18+)	Weekly Increase	
National	1,341,333	+130,929	
ACT	40,722	+3,796	
NSW	428,223	+40,582	
NT	5,027	+401	
QLD	242,358	+24,455	
SA	121,334	+9,962	
TAS	40,348	+3,764	
VIC	352,773	+34,686	
WA	110,548	+13,283	

[#]The number of people with a dose will not match the number of doses administered. This can occur when a person receives a valid dose but then permanently leaves Australia,

when a person receives multiple doses in a short time period (such as a specific health recommendation or a vaccine administration error), or in the case of data input errors into the Australian Immunisation Register.

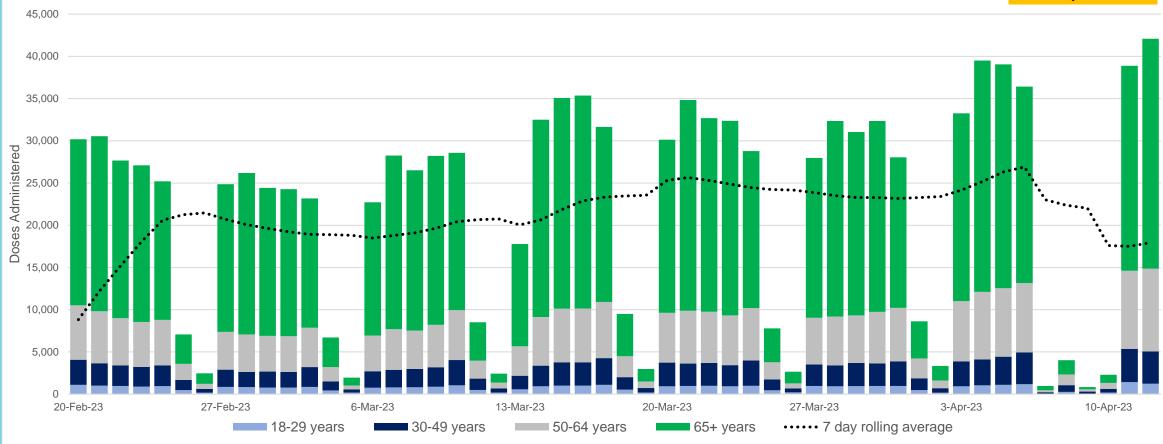

^{##}Unvaccinated population is based on the total Estimated Residential Population minus individuals who have a dose recorded in the Australian Immunisation Register.
###State breakdown is based on the state in which a vaccine was physically administered, and may differ from a person's residential address.

COVID-19 2023 Booster Doses

Australia's COVID-19 Vaccine Program

Data as at: 12 Apr 2023

Number of 2023 Booster Doses* administered by week# and age group##

^{*}The 2023 Booster program commenced on 20 February 2023. Some doses may have been administered before the official commencement date.

[#]Date is based on the date a dose was physically administered rather than the date the information was recorded/known.

^{##}The number of doses by age group is based on an individual's current age and may be different from the age at vaccination.

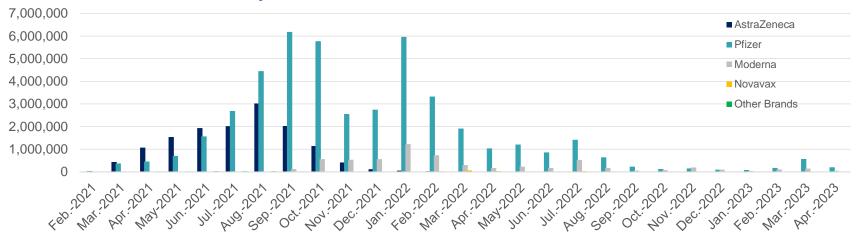

The number of people with a dose will not match the number of doses administered. This can occur when a person receives a valid dose but then permanently leaves Australia, when a person receives multiple doses in a short time period (such as a specific health recommendation or a vaccine administration error), or in the case of data input errors into the Australian Immunisation Register

COVID-19 vaccines administered over time

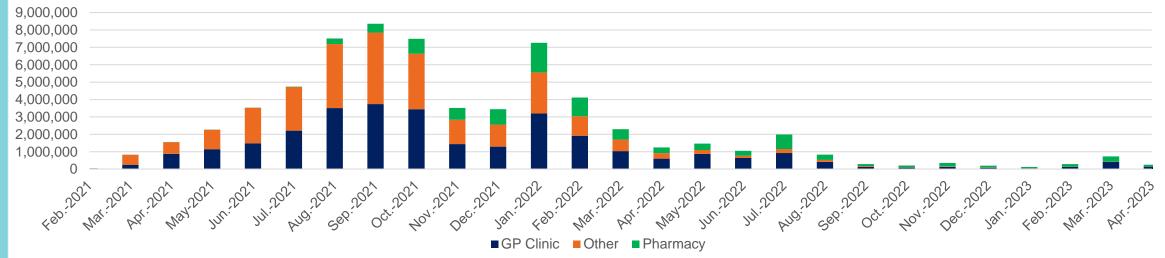

Australia's COVID-19 Vaccine Program

Data as at: 12 Apr 2023

Number of doses administered by month since start of rollout

A small number of doses are not included in the above graph as they were administered internationally to Australians prior to 20 February 2021.

Other consists of Aged Care and Disability, Jurisdictions, and Other Primary Care channels.

Vaccinations by age and location

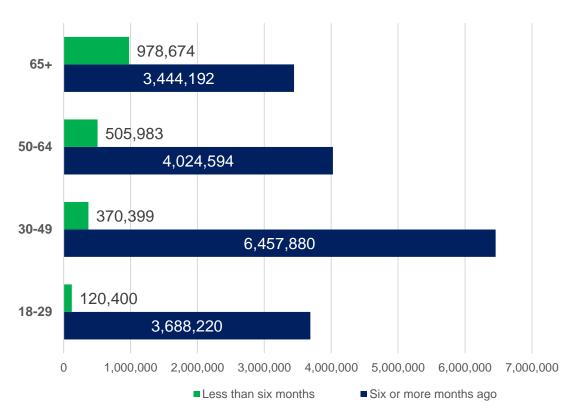

Australia's COVID-19 Vaccine Program

Data as at: 12 Apr 2023

Time since individuals last vaccination by residential state (18+)

Residential State*	Less than six months	Six or more months ago	Unvaccinated [#]	
National	1,975,456	17,614,886	449,381	
ACT	55,615	289,052	10,605	
NSW	631,451	5,528,705	160,042	
NT	9,902	155,993	21,203	
QLD	353,500	3,431,708	248,285	
SA	167,392	1,178,423	85,080	
TAS	54,159	378,172	20,695	
VIC	516,730	4,535,357	81,590	
WA	174,367	1,880,525	67,299	
Unknown/Other	12,340	236,951	N/A	

Time since individuals last vaccination by age (18+)

^{*}Residential state is based on a person's usual state of residence. In some cases, a residential address may be in Other Territories or unable to be linked to a state and result in unknown values.

#Unvaccinated population is based on the total Estimated Residential Population minus individuals who have a dose recorded in the Australian Immunisation Register.

Aboriginal and Torres Strait Islander peoples

109,045

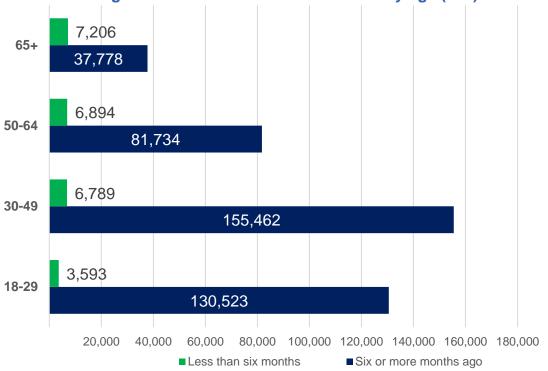

Indigenous individuals aged 5 to 17 have received a vaccination

Time since Indigenous individuals last vaccination by state (18+)

Residential State*	Less than six months	Six or more months ago	Unvaccinated [#]	
National	24,482	405,497	69,890	
ACT	CT <500 4,200		<500	
NSW	8,017	123,582	17,472	
NT	1,549	35,613	3,966	
QLD	5,932	106,899	23,167	
SA	1,448	18,183	4,286	
TAS	TAS 1,076		1,581	
VIC	2,371	32,893	3,523	
WA	2,572	49,039	6,983	
Unknown/Other	known/Other 1,071		8,542	

^{*}Residential state is based on a person's usual state of residence. In some cases, a residential address may be in Other Territories or be unable to be linked to a state and result in unknown values. Identification as Aboriginal and/or Torres Strait Islander in the Australian Immunisation Register is optional and the estimated population may be under reported.

[#]Unvaccinated population is based on the total Indigenous population in the Australian Immunisation Register minus Indigenous individuals who have a dose recorded in the Australian Immunisation Register.

Residential aged care vaccination rollout

Australia's COVID-19 Vaccine Program

Data as at: 12 Apr 2023

59,118 (33.1%)

aged care residents estimated with a vaccine dose or infection in the last six months

(with recent immunity and not currently eligible for a 2023 Booster Dose)

17,754 (13.9%)

estimated eligible aged care residents with a COVID-19 2023 Booster Dose

The estimated eligible population is made up of residents who have completed their COVID-19 primary course, and had their last COVID-19 vaccine dose or infection more than six months ago. As residential aged care populations are fluid, and case overlay is not exact, eligible populations for vaccination are an estimate only.

Aged Care COVID-19 2023 Booster Doses

	2023 Booster Doses			
Jurisdiction	% of eligible residents vaccinated	Residents vaccinated		
National	13.9%	17,754		
ACT	28.0%	506		
NSW	14.0%	5,801		
NT	3.9%	<200		
QLD	12.0%	3,080		
SA	15.3%	1,536		
TAS	18.6%	568		
VIC	15.7%	5,256		
WA	8.7%	996

WA	28,396	372,593	18,906	17,830	291,709	14,008

^{*}Individuals with culturally and linguistically diverse (CALD) backgrounds are as reported in the 2021 Census and do not include Aboriginal and Torres Strait Islander peoples. The Born Overseas cohort excludes those born in the United Kingdom, Ireland and New Zealand. The data excludes those who have since departed Australia and deceased persons since the 2021 Census. There is an overlap across CALD cohorts where individuals may have reported they had more than one CALD characteristic in the 2021 Census.

#Unvaccinated population is based on the total cohort from the 2021 Census linked in MADIP minus those who have a dose recorded in the Australian Immunisation Register.

Small negative changes may appear when compared with the previous report due to perturbation, data maturity and changes in population sizes.

Source: Australian Immunisation Register linked to the Multi-Agency Data Integration Project (MADIP)

Explanatory notes

Please note that a person's COVID-19 infection history cannot be linked to their vaccination records at this time. This means we cannot estimate population eligibility or provide information on population coverage. For this reason, the number of boosters and the number of people based on their time since last vaccination have been provided.

The Australian Immunisation Register (AIR): the Australian Immunisation Register is a national register that records all vaccines given to people in Australia.

Doses administered: the total number of COVID-19 vaccination records in the Australian Immunisation Register. This includes all records, including vaccine administration errors, doses that were administered to people who are no longer active in Australia (relocated or passed away), and doses administered to people overseas who have since interacted with the Australian health system. The number of doses administered is different to the number of people with a dose. The number of doses administered is normally shown by the provider state, while the number of people with a dose is normally shown by a person's residential state.

Time Since Last Vaccination: the time that has elapsed since a person's last recorded COVID-19 vaccine, based on the administration date in the Australian Immunisation Register.

2023 Booster Doses: any booster dose administered since 01 January 2023, to individuals aged 18 and over.

Age: unless otherwise specified, age is calculated based on the age of a person at the time of reporting. It is possible for a person to move across cohorts over time however they are counted in only one cohort at the time of reporting.

Aboriginal and Torres Strait Islander peoples: the Aboriginal and Torres Strait Islander population refers to the number of individuals that identify as Aboriginal and Torres Strait Islander in the Australian Immunisation Register. Identifying as Aboriginal and/or Torres Strait Islander is optional, and the estimated population may be under reported. Numbers include all Aboriginal and Torres Strait Islander peoples who have received a vaccination and are not limited to those administered in an ACCHS setting.

Other Priority Populations: some cohorts of interest are unable to be identified in the Australian Immunisation Register alone. For information on these priority populations, please refer to the caveats with the data, as these use different data assets and may have different methodologies that are not directly comparable to the general population.

International doses: vaccination doses that are recognised by the Therapeutic Goods Administration (TGA) and were physically administered outside of Australia to people included in the Australian Immunisation Register. Please note that many of these doses are assigned to a default provider with a location in the Australian Capital Territory.

Weekly increases: are the difference between the reported total from last week and the total this week. This captures all new records uploaded into the Australian Immunisation Register, even if the doses were not physically administered during this time period (i.e., if a provider enters a record late).

Update information: vaccine data is sourced from the Australian Immunisation Register as at 11:59pm 12 April 2023 unless otherwise noted.
