Top up your COVID-19 protection

This winter, give yourself the highest level of protection against severe illness or death from COVID-19. Top up your protection and receive all recommended COVID-19 vaccination doses based on your age or individual health needs.

Everyone 18 years and over can get a booster if it has been 6 months or longer since their last COVID-19 booster or confirmed infection (whichever is most recent) to maintain protection from COVID-19.

Boosters are strongly recommended for people at a higher risk of severe illness:

- everyone 65 years and over
- everyone 18 years and over with medical comorbidities, disability or complex health needs.

To find more information about [COVID-19 boosters](#), visit the Department of Health and Aged Care website or [find a clinic](#) and book to top up your protection.

Top up your COVID-19 protection this winter

As we head into the cooler months, taking all necessary precautions to protect yourself and those around you is important. One of the best ways to do so is by topping up your COVID-19 protection and receiving your booster vaccination.

Boosters provide the best protection against severe illness from COVID-19. If you are at a higher risk, we highly recommend booking your booster if it's been 6 months or longer since your last COVID-19 booster or confirmed infection.

Find a clinic and [book your booster](#) if you're due for one, and top up your protection this winter.
