Statina Healthcare Corsinel – male boxer support garment – ST#01MAY2023

Deletion on the Stoma Appliance Scheme

In 2019 and 2020, the Stoma Product Assessment Panel (Panel) reviewed support garment products listed in subgroup 9(h) of the Stoma Appliance Scheme (SAS) Schedule for clinical effectiveness. All suppliers of these products were provided the opportunity to provide clinical evidence to support their inclusion on the SAS Schedule. The evidence could include reports, clinical trials and studies regarding the use of support belts, abdominal binders and support garments in stoma management.

Following consideration of the evidence, the Panel recommended that support wear products in subgroup 9(h) should be removed from the SAS Schedule. The Panel also recommended that the maximum annual quantity of support belts in subgroup 9(h) should increase to 4 and that prices should be standardised to the benchmark price of \$45.15. These Panel considerations and recommendations are available publicly.¹

The Panel recommended deleting 13 support garments SAS codes from subgroup 9(h). The costs of the products to be deleted are all above the benchmark price for products in subgroup 9(h) and provided no additional clinical benefit to products listed at the benchmark price.

Recommendation

The Panel considered the listing on the SAS Schedule of Statina Healthcare Corsinel – male boxer support garment (SAS Code 3982N) in subgroup 9(h) and recommended deleting the entire product range of the current listing. The product, including 8 variants, is currently listed at a unit price of \$120.02 and a maximum annual quantity of 3 units.

Stoma associations, ostomates, stomal therapy nurses and the Australian Council of Stoma Associations will be advised of the deletion with sufficient time to allow users of the product to seek a suitable alternative and to enable stoma associations to manage their stock levels.

Variants to be deleted

Product Code	Description
314750MLLG	Male Boxer Support Garment, Low Waist, Large, R2
314750MLMD	Male Boxer Support Garment, Low Waist, Medium, R2
314750MLSM	Male Boxer Support Garment, Low Waist, Small, R2
314750MLXL	Male Boxer Support Garment, Low Waist, Extra Large, R2
314950MHLG	Male Boxer Support Garment, High Waist, Large, R2
314950MHMD	Male Boxer Support Garment, High Waist, Medium, R2
314950MHSM	Male Boxer Support Garment, High Waist, Small, R2
314950MHXL	Male Boxer Support Garment, High Waist, Extra Large, R2

Financial Analysis

It is expected the deletion will have a budgetary impact with an estimated save for the SAS which has been agreed by the Department of Finance. Substitute products are currently listed in subgroup 9(h) of the SAS Schedule.

Background

This product was first listed on the SAS Schedule on 1 July 2014.

Context for Recommendation

The Minister for Health and Aged Care has agreed to the recommendation, with changes to take effect from 1 October 2023.

Supplier Comment

The supplier noted the Panel recommendation.

Statina Healthcare Corsinel – female lace support garment – ST#02MAY2023

Deletion on the Stoma Appliance Scheme

In 2019 and 2020, the Stoma Product Assessment Panel (Panel) reviewed support garment products listed in subgroup 9(h) of the Stoma Appliance Scheme (SAS) Schedule for clinical effectiveness. All suppliers of these products were provided the opportunity to provide clinical evidence to support their inclusion on the SAS Schedule. The evidence could include reports, clinical trials and studies regarding the use of support belts, abdominal binders and support garments in stoma management.

Following consideration of the evidence, the Panel recommended that support wear products in subgroup 9(h) should be removed from the SAS Schedule. The Panel also recommended that the maximum annual quantity of support belts in subgroup 9(h) should increase to 4 and that prices should be standardised to the benchmark price of \$45.15. These Panel considerations and recommendations are available publicly.²

The Panel recommended deleting 13 support garments SAS codes from subgroup 9(h). The costs of the products to be deleted are all above the benchmark price for products in subgroup 9(h) and provided no additional clinical benefit to products listed at the benchmark price.

Recommendation

The Panel considered the listing on the SAS Schedule of Statina Healthcare Corsinel – female lace support garment (SAS Code 3983P) in subgroup 9(h) and recommended deleting the entire product range of the current listing. The product, including 8 variants, is currently listed at a unit price of \$120.02 and a maximum annual quantity of 3 units.

Stoma associations, ostomates, stomal therapy nurses and the Australian Council of Stoma Associations will be advised of the deletion with sufficient time to allow users of the product to seek a suitable alternative and to enable stoma associations to manage their stock levels.

Statina Healthcare Corsinel – Medium Support Underwear – ST#03MAY2023

Deletion on the Stoma Appliance Scheme

In 2019 and 2020, the Stoma Product Assessment Panel (Panel) reviewed support garment products listed in subgroup 9(h) of the Stoma Appliance Scheme (SAS) Schedule for clinical effectiveness. All suppliers of these products were provided the opportunity to provide clinical evidence to support their inclusion on the SAS Schedule. The evidence could include reports, clinical trials and studies regarding the use of support belts, abdominal binders and support garments in stoma management.

Following consideration of the evidence, the Panel recommended that support wear products in subgroup 9(h) should be removed from the SAS Schedule. The Panel also recommended that the maximum annual quantity of support belts in subgroup 9(h) should increase to 4 and that prices should be standardised to the benchmark price of \$45.15. These Panel considerations and recommendations are available publicly.³

The Panel recommended deleting 13 support garments SAS codes from subgroup 9(h). The costs of the products to be deleted are all above the benchmark price for products in subgroup 9(h) and provided no additional clinical benefit to products listed at the benchmark price.

Recommendation

The Panel considered the listing on the SAS Schedule of Statina Healthcare Corsinel – Medium Support Underwear (SAS Code 80173P) in subgroup 9(h) and recommended deleting the entire product range of the current listing. The product, including 20 variants, is currently listed at a unit price of \$58.00 and a maximum annual quantity of 6 units.

Stoma associations, ostomates, stomal therapy nurses and the Australian Council of Stoma Associations will be advised of the deletion with sufficient time to allow users of the product to seek a suitable alternative and to enable stoma associations to manage their stock levels.

Statina Healthcare Corsinel – ST#04MAY2023

Deletion on the Stoma Appliance Scheme

In 2019 and 2020, the Stoma Product Assessment Panel (Panel) reviewed support garment products listed in subgroup 9(h) of the Stoma Appliance Scheme (SAS) Schedule for clinical effectiveness. All suppliers of these products were provided the opportunity to provide clinical evidence to support their inclusion on the SAS Schedule. The evidence could include reports, clinical trials and studies regarding the use of support belts, abdominal binders and support garments in stoma management.

Following consideration of the evidence, the Panel recommended that support wear products in subgroup 9(h) should be removed from the SAS Schedule. The Panel also recommended that the maximum annual quantity of support belts in subgroup 9(h) should increase to 4 and that prices should be standardised to the benchmark price of \$45.15. These Panel considerations and recommendations are available publicly.⁴

The Panel recommended deleting 13 support garments SAS codes from subgroup 9(h). The costs of the products to be deleted are all above the benchmark price for products in subgroup 9(h) and provided no additional clinical benefit to products listed at the benchmark price.

Recommendation

The Panel considered the listing on the SAS Schedule of Statina Healthcare Corsinel (SAS Code 9958D) in subgroup 9(h) and recommended deleting the entire product range of the current listing. The product, including 16 variants, is currently listed at a unit price of \$120.02 and a maximum annual quantity of 3 units.

Stoma associations, ostomates, stomal therapy nurses and the Australian Council of Stoma Associations will be advised of the deletion with sufficient time to allow users of the product to seek a suitable alternative and to enable stoma associations to manage their stock levels.
