

# Integrating Pharmacists within Aboriginal Community Controlled Health Services to improve Chronic Disease Management (IPAC) Core Role 10 - Transitional Care

- Aims to optimise management of medication for patients across the continuum of care
- Practice pharmacist will facilitate ad-hoc care coordination
- This will help to ensure seamless care by relaying all relevant information
- Improved transitional care coordination is anticipated to lead to improved discharge summary management and medicines reconciliation

- Patient ID not required
- Multiple 'events' can be recorded
- Which agency did you engage with to support the transitional care of your patient?
- How was the contact made?
- Specify the reason(s) contact was made with this agency
- What was the date of this contact?
- Time taken

Thank you!
