\*Cases reported to the NNDSS may be an underrepresentation of the true incidence as they are only inclusive of laboratory-confirmed cases and if infection is mild or asymptomatic medical treatment may not be sought.

†Deaths reported to the NNDSS may be an underrepresentation of the true mortality associated with a notifiable disease as they are only inclusive of laboratory-confirmed cases, and follow-up of case outcomes by state and territory public health is not a requirement of notification.

#Data were extracted on 24 August 2023. Due to the dynamic nature of the NNDSS, data in this extract are subject to retrospective revision and may vary from data reported in published NNDSS reports and reports of notification data by states and territories.
