

COVID-19 outbreaks in Australian residential aged care facilities

National snapshot

As at 8:00 am 15 February 2024 there are 1,852 active COVID-19 cases in 262 active outbreaks in residential aged care facilities across Australia. There have been 114 new outbreaks, 17 new resident deaths and 1,696 combined new resident and staff cases reported since 8 February 2024.

¹ Outbreak opening and closure includes changes in the status of exposure sites to outbreaks (and vice versa), which are applied retrospectively to facility records. New case information can also change the status of a recovered site back to an active outbreak site. As a result, changes in active outbreak status may not align with day on day variations to active totals. These adjustments will also affect the number of cases in staff and residents reported each week.

² Active residents and staff cases are the total currently positive cases in active outbreaks

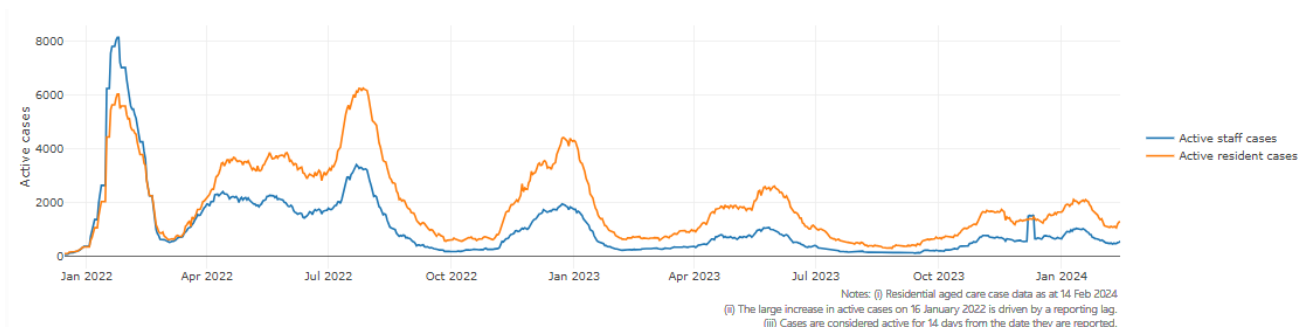

³ An outbreak is considered to be active pending advice from the relevant Public Health Unit. An outbreak is defined as at least 1 positive case in a resident or 2+ cases in staff.

⁴ Case numbers and numbers of deaths are dependent upon reporting from facilities and validation of deaths from state and territory governments. This is subject to change as further information is provided.

Mortality

For the period of 1 July 2023 to 10 February 2024, COVID-19 is recorded as the cause of death in 1.6% of all deaths in permanent residents in aged care homes.

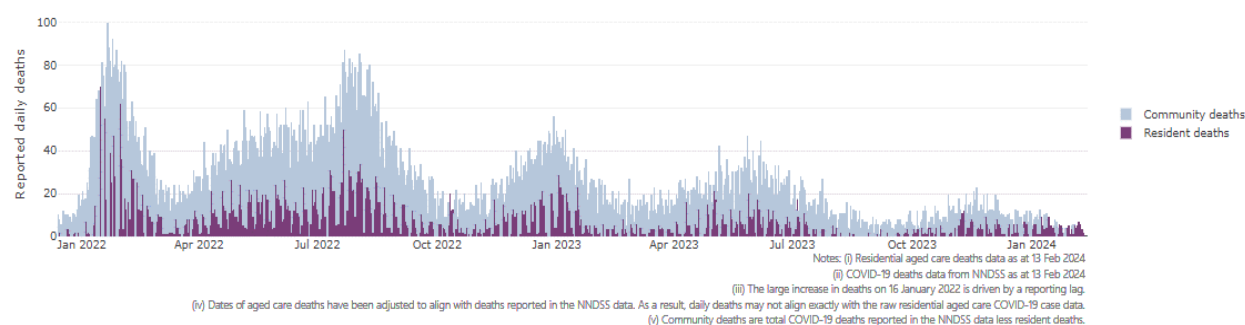

Since the beginning of the Omicron outbreak in mid December⁵ 2021, there have been 129,697 deaths in residential aged care from all causes (report period from 15 December 2021 to 10 February 2024)⁶. COVID-19 deaths account for 4.2% of this figure.

Over the course of the pandemic, all-cause excess mortality in residential aged care was below expected numbers in 2020, and within expected range in 2021. In the first half of 2022, all-cause excess mortality in residential aged care was above the expected range. Excess mortality for the second half of the 2022 is yet to be finalised.

⁵ The Omicron outbreak start date has been redefined from late November 2021 to mid December 2021. Changes have been made to align reporting with the start date of Omicron published in the Department's external facing Epidemiology report.

⁶ The Department is now accessing aged care deaths data from the SIEBEL dataset. Figures are live and subject to change. Source: Department of Health and Aged Care unpublished data / SIEBEL dataset.

Workforce in active residential aged care outbreaks

As at 16 February 2024, workforce surge staff have filled a total of 188,357 shifts in aged care services, including 288 in the past 7 days. In the past 7 days (to 16 February 2024) surge workforce providers have assisted 25 residential aged care homes. These shifts include roles for GPs, nurses, care workers, allied health workers, executive and ancillary staff. This includes:

Table 3: Workforce resources supplied to residential aged care facilities

Workforce provider	Total shifts	Previous 7 days
Recruitment, Consulting and Staffing Association	103,905	0
Healthcare Australia (Workforce Surge)	15,565	0

Torrens	4,056	N/A

The Australian Defence Force provided support to a total of 542 residential aged care homes between February and September 2022. The ADF deployment ceased on 30 September 2022.

Oral antiviral treatments

Distribution of the oral anti-viral Lagevrio (Molnupiravir) commenced on 6 February 2022 to all RACF facilities with outbreak sites prioritised for delivery. The National Medical Stockpile has deployed 48,269 treatment courses of Lagevrio (Molnupiravir) to aged care facilities.

99,877 prescriptions for Lagevrio (Molnupiravir) have been issued to residents in residential aged care facilities, with a further 9,759 prescriptions for Paxlovid (nirmatrelvir + ritonavir) also issued since 28 February 2022 and up to 31 January 2024.

*Note: Oral antiviral data is only being updated monthly.

Vaccination in residential aged care facilities

People living in residential aged care are a high priority for the Government's COVID-19 vaccination program.

Older age remains the biggest risk factor for severe COVID-19 disease. Vaccination offers added protection to help reduce the risk of severe illness or hospitalisation of aged care residents.

The Department is working with both the aged care and primary care sectors to ensure residents have access to the COVID-19 vaccine. It continues to target support for residential aged care facilities to arrange COVID-19 vaccinations with local primary care providers such as GPs, community pharmacists and Aboriginal Community Controlled Health Services.

As at 14 February 2024*:

- 69.9% of aged care residents have received a booster dose since 1 January 2023.
- 66.8k (36.2%) of aged care residents received a booster dose in the last 6 months.
- 3,384 aged care residents received a vaccine dose in the last week.

**An updated methodology has been implemented (resulting in an increase in total residents and vaccination numbers).*

Table 4: Aged care COVID-19 booster doses (data as at 14 February 2024)

VIC	17.5k	36.8%
WA	4.6k	26.9%

Source: Matched Australian Immunisation Register (AIR) data of residents in permanent residential aged care.

For reporting accuracy, the total aged care resident population only includes residents who have been linked with their vaccination records. As residential aged care populations are fluid, the total population for vaccination are an estimate only and there is an administrative lag with the aged care recipient data which is linked to AIR data. Counts may fluctuate due to enhancements to data over time.

Infection control and audit

The Aged Care Quality and Safety Commission (Commission) conducts a range of site and non-site activities to monitor and assess residential aged care services, including site audits and assessment contacts (site and non-site) (see Table 5 below). In August 2020, the Commission commenced an infection control monitoring (ICM) spot check program in all Australian jurisdictions.

The ICM spot check program involves on-site visits to residential aged care services, without an outbreak, to check compliance with personal protective equipment (PPE) and infection control arrangements. The purpose of the ICM spot check is to observe infection control practices, to ensure that staff, management and visitors were adhering to safe personal protective equipment protocols and to safe infection control arrangements as required under the quality standards.

As at 15 February 2024, the Commission had conducted 6,008 ICM spot checks to observe infection control practices and PPE protocols in residential aged care facilities.

Appendix 1: National residential aged care services with active outbreaks COVID-19

Please note, information reported in this table has been directly reported to the Department of Health and Aged Care by residential aged care facilities. Total cases refers to all staff and resident cases associated with the active outbreak and may not reflect the count of currently active cases. Where numbers have been incorrectly reported, facilities are able to correct these in the COVID-19 Support Portal through My Aged Care. Where a facility is reporting less than six resident or staff cases or less than six deaths, data has been suppressed to protect the privacy of affected individuals (note that “n/p” indicates data is not provided to protect privacy).
