

Australian Immunisation Register - Influenza Data - 1 March to 5 May

Notes and Caveats										
- All data is based on influenza vaccinations reported to the Australian Immunisation Register (AIR) as at COB 5 May 2024.										
- Data is from 1 March to 5 May for each encounter year.										
- Influenza vaccination data is not directly comparable across years due to a range of factors, including:										
- The impact of the COVID-19 pandemic and national and local responses to the pandemic over time										
- Early in the influenza season, the timing of seasonal events such as Easter										
- Timing of vaccines provided by pharmaceutical companies for clearance through the Therapeutic Goods Administration (TGA)										
- Supply of vaccines and commencement of flu season.										
- Vaccinations where the person has since been 'End dated' in the Medicare Consumer Directory (due to death, emigration, etc) are included in the data.										
- Data includes influenza vaccinations given to Medicare eligible and non-Medicare eligible individuals.										
- The counted values represent a count of all vaccination episodes.										
- A 'Vaccination episode' is linked to a State or Territory based on the vaccinated individuals Medicare residential address at the time of the report's creation.
