

# DON'T DELAY

## do a bowel test **today**

.....

If you are aged 45 to 74, ask your health worker or doctor  
about getting the free bowel screening test.

# BOWEL CANCER CAN DEVELOP WITHOUT ANY SYMPTOMS

Bowel cancer is the third most common cancer for Aboriginal and Torres Strait Islander people.

The good news is, there is a free and simple test that can find it early. If found early, bowel cancer can be successfully treated in more than 90% of cases.

**Stay healthy and strong for your family and do the free bowel test.**
