

Introducing MyMedicare for Clinics and Practices

MyMedicare is a new voluntary patient registration program designed to connect you with your patients.

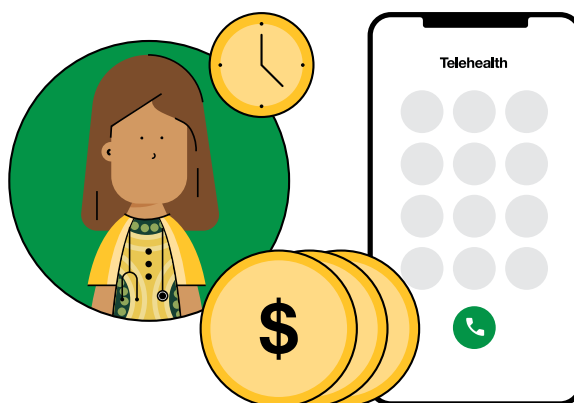

How does MyMedicare benefit my clinic or practice?

Registering in MyMedicare benefits both you and your patients. Clinics and practices registered in MyMedicare will be able to access a range of new funding and incentives that can help you continue to provide the very best care. These include:

- New, longer telephone calls for eligible patients.
- Tripling the amount of existing MBS bulk billing incentive payments for longer telehealth consultations for your regular patients.
- The General Practice in Aged Care Incentive, which will support regular doctor visits for people in residential aged care homes.

- Linking Chronic Disease Management items to a patient's registration. This means that, while Chronic Disease Management items will be available to everyone, registered patients will only be able access these items from their registered clinic or practice, to better support the delivery of this care available from November 2024.

I've registered my clinic or practice, what else do I need to do?

It's important to encourage your patients to register in MyMedicare as you **both** need to be registered to get the full benefit.

This can be done by the patient through their Medicare Online Account or Express Plus Medicare mobile app.

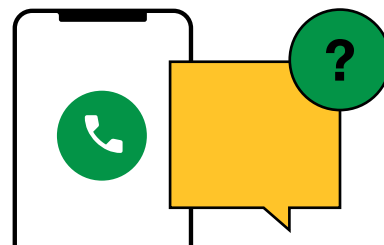

Alternatively, you can help them fill out a registration form and enter these details into the MyMedicare system. You can download the form here: health.gov.au/mymedicare

Can someone help me register my clinic or practice?

For help registering your clinic or practice in MyMedicare, you can contact Services Australia who can support you through registration and answer any of your questions.

Visit hpe.servicesaustralia.gov.au or call 132 150.

How can I find more detailed information?

To find more detailed information about MyMedicare and registration, head to health.gov.au/mymedicare
