

# Cervical cancer is preventable.

A Cervical Screening Test  
could **save your life.**

NATIONAL  
CERVICAL SCREENING  
PROGRAM

A joint Australian, State and Territory Government Program

Australian  
Multicultural  
Health  
Collaborative

Women and people with a cervix aged 25-74 should have a Cervical Screening Test every 5 years.

Your doctor can do the test or you can do it yourself  
- **self-swab is simple, quick, and private.**
