

The department commenced reporting vaccinations, at the jurisdictional level, from 3 August 2022. The tables provide COVID-19 third and fourth dose vaccination rates of aged care residents by facility across Australia.

Data was retrieved from the Australian Immunisation Register and updated weekly. The information does not account for residents' eligibility for a vaccine following COVID-19 infection.

The data does not account for residents who:

- may not yet be eligible for a COVID-19 vaccine because they have had a COVID-19 infection in the last three months, or
- are unwilling or clinically unsuitable to receive a COVID-19 vaccine.

To protect the personal information of individuals:

- a facility's resident vaccination rate is displayed within a range (for example 90–100%)
- a band's width is based on the number of residents at that residential aged care facility
- larger percentage bands are used when reporting vaccination rates for residential aged care facilities with less than 20 residents
- data for facilities with fewer than 5 residents are not included.

The department ceased updating the public data while implementing a shift in reporting methodology to provide data on residents who have received a COVID-19 vaccination within the last six months and the last 12 months at the facility level.

The shift in reporting methodology occurred to align with recommendations for COVID-19 vaccinations every 6 months. This public reporting commenced in June 2024 and is available at

<https://www.health.gov.au/resources/publications/residential-aged-care-residents-covid-19-vaccination-rates?language=en>.

Service name	Service address	Percentage of residents who have received three doses, of the total residents at the facility	Percentage of residents who have received four doses, of the residents who received their third dose over three months ago	Data generated
