

# Framework for Recommendation Analysis

*In considering the implementation of recommendations, the following questions will be considered by the Implementation Advisory Group.*

<b>SCOPE</b>	<p>Are the actions required to implement this recommendation clear?</p> <p>Are there any ambiguities that need clarification?</p> <p>Are both the objectives and the outcomes for the recommendation captured?</p>
<b>VALUE/IMPACT</b>	<p>What are the anticipated benefits/value/impact of the actions, assessed against: patient outcomes, timely access, equity, system efficiency and Australian market attractiveness?</p>
<b>DEPENDENCIES/ SEQUENCING</b>	<p>How does this link with the Enhance HTA report recommendations and/or New Frontier report?</p> <p>How does this recommendation integrate with other work underway and with other recommendations?</p> <p>Are there any dependencies or prerequisites that need to be considered?</p>
<b>IMPLEMENTATION COMPLEXITY</b>	<p>What are the potential risks associated with implementing this recommendation?</p> <p>Anticipated difficulty with implementation?</p>
<b>WHO</b>	<p>Who is involved/required to deliver the implementation?</p> <p>Who is impacted by the recommendation?</p> <p>What are the views of consumers, and other stakeholders, including industry and clinicians. In what ways will stakeholders be impacted?</p>
<b>COST</b>	<p>Estimated costs to implement?</p> <p>If new funding is required where could the funding potentially come from?</p>
<b>RESOURCES</b>	<p>What human, financial and technological resources are needed to implement this recommendation?</p>
<b>IMPLEMENTATION TIMING</b>	<p>Can this recommendation be implemented in the short term, medium term, or long term?</p>
<b>MEASUREMENT</b>	<p>Once implemented how will we know it has been successful?</p> <p>Are there any expected key performance indicators/success factors?</p>
