

Middle East Respiratory Syndrome (MERS) Travel Warning

Are you returning from the Middle East? Know the symptoms of MERS.

MERS is a disease originating in the Middle East that can pass from camels, their products or infected people to other people. If you have recently travelled to the Middle East, speak to a health professional if you experience:

Fever

Cough

Difficulty breathing

Muscle pains

Diarrhoea

Vomiting and nausea

Visit health.gov.au/MERS for more information.
