## Our supervision of the sector

#### Risk surveillance

Providers who only require risk surveillance represent the lowest risk cohort.

## Targeted supervision

Targeted supervision in most circumstances will involve the Commission taking regulatory action to manage specific events or issues.

## Active supervision

Providers are assigned an active supervision status where high-level risks are identified that are most effectively dealt with at a provider level.

## Heightened supervision

Only a small number of providers will be assigned into heightened supervision, representing a cohort that is the highest risk caseload and one the Commission has most concern over.
