## GP Non-Referred Attendances (GP NRA) per Patient Bulk Billing Ranges, 2024-25

(including temporary COVID-19 Vaccines items)

Always Bulk Billed
49.1%

Last Year: 47.7%

Usually Bulk Billed 23.4%

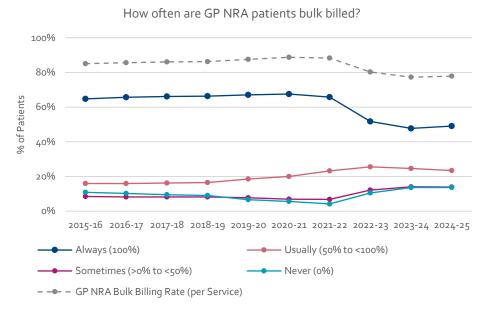

Last Year: 24.6%

13.9%
Last Year: 14.0%

Never Bulk Billed 13.6% Last Year: 13.6%

Many patients have more than one GP NRA service during the year. This page shows the proportion of patients who were always, usually, sometimes, or never bulk billed across **all** of their GP NRA services.

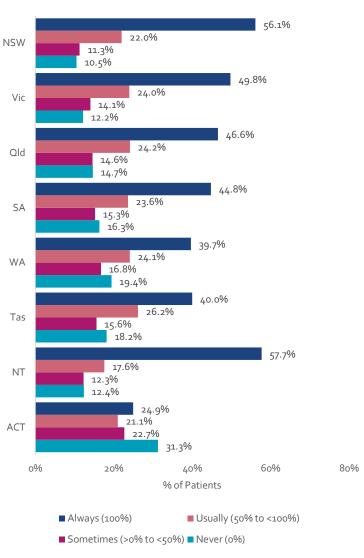

In 2024-25, the proportion of GP NRA patients who were always or usually bulk billed **increased from** 72.4% to 72.5% while the proportion of patients who were never bulk billed **increased from** 13.6% to 13.6%.

The proportion of patients always (100%) bulk billed tends to be lower than the bulk billing rate because patients with, for example, 9 out of 10 services (90%) bulk billed are classified as "usually" bulk billed.

Last Year: 14.0%

COVID-19 vaccine items were introduced in late February 2021 and had peak usage in the 2021-22 financial year. As bulk billing for COVID-19 vaccine items is mandatory, they impacted the bulk billing rate. This page shows the proportion of patients who were: always, usually, sometimes, or never bulk billed across their GP NRA services **excluding** COVID-19 vaccines.

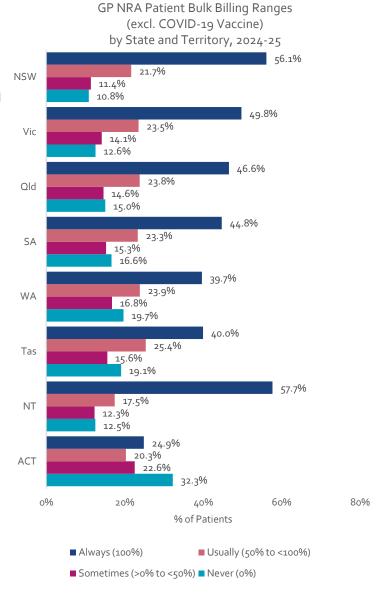

In 2024-25, the proportion of GP NRA patients who were always or usually bulk billed **increased from 72.0% to 72.1%** while the proportion of patients who were never bulk billed **increased from 14.0% to 14.0%**.

How often are GP NRA patients bulk billed?

The proportion of patients always (100%) bulk billed tends to be lower than the bulk billing rate because patients with, for example, 9 out of 10 services (90%) bulk billed are classified as "usually" bulk billed.
