

# Health Technology Assessment Review Implementation Advisory Group

## Communique – 14 August Meeting

### Meeting 7

- The IAG met for its seventh meeting on 14 August 2025. This meeting was a full-day virtual meeting.
- Members noted that their Interim Report had been provided to the Minister. The report outlines the IAG's progress, early insights and next steps toward delivering a final report and roadmap by January 2026.
- The focus of the meeting was a workshop style discussion where members started to sequence and prioritise the implementation actions identified through their recommendation analysis work.
- Members further explored the interdependencies between recommendations and the practical considerations for sequencing actions aligned with 5 focus areas:
  1. Improved access and equity
  2. Greater transparency and engagement
  3. Modernised assessment pathways
  4. Better data use and enhanced evidence
  5. HTA workforce capacity and capability
- The input from this meeting will inform the development of a draft roadmap, with members agreeing that further refinement should occur out-of-session.
- The next IAG meeting is scheduled to take place on 11 September 2025.
