

Quick reference guide

Do not open door until you know which vaccines you need and where they are located.

Vaccines must be stored between +2°C and +8°C to guarantee their potency.

Read and record the PBVR temperature twice daily on the 'Strive for 5' Minimum/maximum vaccine refrigerator temperature chart and reset the thermometer.

Is the PBVR temperature between +2°C and +8°C?

Report to nominated vaccine manager if PBVR temperature has been outside the +2°C to +8°C range.

Do not use or discard vaccines unless advised to do so by your state or territory health department.
