## COVID-19 vaccination rates of aged care residents by facility - September 2025

## Data sources and caveats

Sourced from AIR data as at 10 September 2025, residential aged care home (RACH) resident data uses a snapshot of residents present in permanent residential aged care as at 30 June 2025.

Resident COVID-19 vaccination includes any dose number administered to a resident over the past 6 and 12 months. To protect the personal information of individuals:

- The vaccination rate for each aged care home is displayed within a range (for example 90–100%)

- A band's width is based on the number of residents at that residential aged care facility who can be linked to their vaccination records

- Larger percentage bands are used when reporting vaccination rates for residential aged care facilities with 10 or fewer linked residents

- Data for facilities with fewer than 5 linked residents are not included.
