Business to Government (B2G) Conformance Register

The B2G register contains a list of software products that have successfully completed a conformance assessment conducted by the Australian Digital Health Agency. It is maintained to assist providers in identifying trusted digital health solutions.

Please note that the Department does not endorse any specific product. Organisations are encouraged to assess and select software based on their individual needs and operational requirements. They are responsible for selecting software that meets those requirements, and for confirming with their software developer that it remains conformant with the latest available API version

Application Programming Interface (API)	Software name	Software version	Organisation name	Organisation website	Conformance profile	Conformance version	Conformance start date	Conformance end date
Quality Indicators	Data.Loop	0.2	Halo Labs Pty Ltd	https://halolabs.com.au/	Foundational	V1.1	7 Nov 2025	7 Nov 2027
Registered Nurses 24/7	Data.Loop	0.2	Halo Labs Pty Ltd	https://halolabs.com.au/	Foundational	V1.1	21 Nov 2025	21 Nov 2027

**This register is correct as of 21/11/2025
