

CONVERSATION STARTERS

The risk of developing lung cancer increases with age and smoking history.

You may feel fit and healthy and have no symptoms, but you can still be at risk of lung cancer.

The scan is quick and painless and could save your life by checking your lung health.

If lung cancer is found early, most people can undergo curative treatment.

The low-dose CT scan used for lung cancer screening is free under Medicare.

Screen to live a long healthy life and stay healthy for family and friends.
