

# National GP Bulk Billing Snapshot – 1 November 2025 to 31 January 2026

Bulk billing refers to services where the GP accepts the Medicare benefit as full payment and the patient does not incur an out-of-pocket cost. Any Medicare-eligible patient can be bulk billed for a GP service. On 1 November 2025, eligibility for Bulk Billing Incentives was expanded to all Medicare-eligible patients, previously only available to under 16s and concession card holders. The Bulk Billing Practice Incentive Program (BBPIP) also commenced, which provides an additional incentive payment to a practice that fully bulk bills. This dashboard provides a snapshot of bulk billing for GP non referred attendances (GP NRA) and Medicare Bulk Billing Practices (those registered for BBPIP) for the three-month period following commencement of the changes.

National GP NRA Bulk Billing Rate (Nov 2025-Jan 2026)

**81.4%**  
(▲ 4.3pp\*)
