

Australian Government

Department of Health, Disability and Ageing

**Aged Care
Council of Elders**

A voice for older people

The Council of Elders is a direct voice to government for older people, by older people. We come from across Australia, with diverse backgrounds, skills and experiences. We talk to people about aged care and what's important to them when it comes to living and ageing well. We share this feedback with the government to help improve aged care for everyone.
