<FirstName>, it's almost time to do your free bowel screening test.

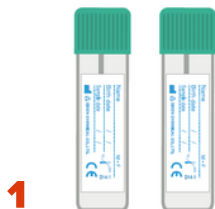

Your free bowel screening test kit will arrive in the mail soon.

It's important you do the test because...

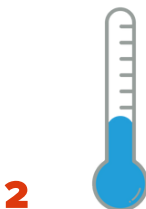

- Your risk of developing bowel cancer increases as you get older.
- Bowel cancer is one of the most common cancers and biggest cancer killers in Australia.
- Bowel cancer can occur without symptoms. **This test can find the early warning signs.**
- If found early, more than 90% of bowel cancer cases can be successfully treated.

Please do the test — it's quick, clean and easy

Everything you need will be inside the kit, including detailed instructions.

**1**  
Collect 2 tiny samples from 2 separate poos.

**2**  
Store your samples somewhere cool. Do not freeze.

**3**  
Post your samples back to us.

To update your details, delay your test, or opt out of the program, go to [www.ncsr.gov.au/manage-participation](http://www.ncsr.gov.au/manage-participation)

ID 3422841
