

Aged Care Act 2024, Training and Education Catalogue

This catalogue lists learning modules and education resources developed by the Department of Health, Disability and Ageing and the Aged Care Quality and Safety Commission (ACQSC) to help aged care providers and workers upskill in areas related to the *Aged Care Act 2024* (the Act). Resources are grouped by key learning areas under the Act, making it easier for providers to identify workforce learning needs and select suitable training and education options.

The catalogue supports flexible, multimodal delivery. For example, instead of using an eLearning module, a provider might choose to share informal learning materials through team meetings or newsletters or integrate them into existing training programs.

Note: Not all learning areas in this catalogue will be relevant to every role, and required learning will vary depending on the responsibilities of different worker groups. This catalogue should be considered a starting point and useful tool for providers to map their workforce against the learning areas and identify which training is most relevant. The training listed is recommended, but not mandatory, and providers are encouraged to complement it with tailored solutions to meet the specific needs of their workforce and services.

For guidance on how to use this catalogue, refer to the *Guide to Creating a Workforce Training Plan – Building Workforce Capability for the Aged Care Act 2024*.
