## Deeming thresholds for Support at Home

Deeming of income is a method of estimating the income created from financial assets. It assumes these assets earn a set rate of income, no matter what they really earn. Deemed income will be included as part of your income in the income assessment. More information on how deeming works can be found on the Services Australia website at

[www.servicesaustralia.gov.au/deeming](http://www.servicesaustralia.gov.au/deeming).
