# 1 Background and overview of the Service and Support Portal

## 1.1 Purpose of the Guide

The My Aged Care Service and Support Portal User Guide – Part One (User Guide) outlines how Commonwealth-funded service providers (providers) set up and maintain the My Aged Care Service and Support Portal (Portal) for your organisation.

The User Guide is split into two parts as follows:

- Part One (this document) provides an overview of the Portal and describes the functions an Administrator can perform.
- Part Two provides an overview of the Portal and describes the functions that a Team Leader or Staff Member can perform.

This guide does not cover:

- Detailed instructions on how to set up organisations in the Relationship Authorisation Manager, which can be found on the [RAM website](#).
- Detailed instructions on how portal users obtain a myID (which can be found in the user guide [Logging in to the Aged Care Systems](#)).

**!** This symbol is used to highlight important information.

## 1.2 Introduction to using the Service and Support Portal

The Service and Support Portal is used to:

- Manage information about the services you provide.
- Manage referrals for service(s) issued by My Aged Care contact centre staff or aged care needs assessors (assessors) by accepting, rejecting, or placing on a waitlist.
- Update client records with information about services being delivered.
- Request that an assessor undertakes a Support Plan Review for a client.
- Report Serious Incident Response Scheme (SIRS) Priority 1 and Priority 2 incidents in residential, in-home, and Support at Home aged care services.
- Generate reports.
- Manage residential client classifications, reassessments, reconsiderations, and palliative care administration.
- Administering Specialisation Verifications.

### 1.3 Service and Support Portal Access

To access the Service and Support portal, each administrator must have a My Aged Care portal user account linked to a supported third-party authentication service. For more information regarding setting up users and logging into the system please refer to [Logging in to the Aged Care Systems](#).

### 1.4 Staff roles in the Service and Support Portal

The person nominated as the Organisation Administrator needs to be the first person from your organisation to log in to the Portal. Refer to [Logging in to the Aged Care Systems](#) for more information.

The Organisation Administrator will be responsible for assigning roles to other staff; this can include assigning other staff the administrator role to help set up and maintain information about your organisation in the Portal. Roles should be assigned in accordance with the duties the person performs within your organisation.

**!** If you are assigned more than one role, this access will apply across all outlets you have been granted access to in the Service and Support Portal.

The following tables outline the functions for each role within the Portal. It includes both client-focussed and organisation-focussed tasks.

#### 1.4.1.4 Homepage for users assigned multiple roles

If you log in to the Service and Support Portal as a user with Administrator, Team Leader, and/or Staff Member roles, you can view the functions for all your roles on the homepage.

## 2 The Administrator Role

Service information is publicly displayed in the My Aged Care service finder (service finder) on the My Aged Care website.

My Aged Care contact centre staff and assessors use this service information to send referrals. Potential My Aged Care recipients and their support network use this service information to research and access services.

It is the Administrator's responsibility to set up and maintain this information to ensure accurate referrals.

### 2.1 Creating service delivery outlets

Administrators will need to set up at least one outlet in the Service and Support Portal before they can add their organisation's service information such as service items. Administrators can choose how to set up service(s) in the Portal: either all under one outlet or under multiple outlets.

Each outlet you set up can have different staff, service information, locations, and contact details recorded. Ideally, outlets should be established based on distinct delivery areas to manage client intake effectively and avoid overlapping delivery areas between outlets to prevent confusion and duplication of services. Refer to the user guide on [Create service delivery outlets and add service information](#) for further information about outlets.

#### 2.1.1 Creating or adding a new outlet

Administrators need to set up outlets in the Portal before service information can be added. When you create an outlet, the status is set to **Inactive** by default. You must activate the outlet and create service items in an outlet before it can be made operational.

1. From the Outlet administration page, select **ADD NEW OUTLET**.

The screenshot shows the 'Outlet Administration' interface. At the top, there's a header 'Outlet Administration' and a sub-header 'About Aussie Healthcare'. ## 2.1.4 Specialisation Verification

All service providers must provide inclusive aged care services based on the needs of an individual, regardless of the individual's location, background and life experiences. Some service providers can be recognised for offering tailored aged care services, verified through Specialisation Verification.

While all providers must demonstrate that they meet the Aged Care Quality Standards, providing specialisation for aged care services under Specialisation Verification is an optional and additional step.

When applying for Specialisation Verification, service providers must demonstrate their outlet meets the [2025 Specialisation Verification Framework](#) criteria for a specific specialisation group or community by providing the required forms of evidence. Outlets can be verified in any of the nine specialisations to support:

- Aboriginal and Torres Strait Islander persons, including the Stolen Generations
- Veterans or war widows
- People from culturally, ethnically, and linguistically diverse (CALD) backgrounds
- People who are financially or socially disadvantaged
- People who are experiencing homelessness or at risk of experiencing homelessness
- Parents and children who are separated by forced adoption or removal
- Care leavers, including Forgotten Australians and former child migrants placed in out of home care
- Lesbian, gay, bisexual, trans/transgender or intersex or have other sexual orientations or are gender diverse or bodily diverse
- People who live in rural, remote, or very remote area

Outlets with verified specialisations are displayed in **service finder** and **match and refer** when searching for aged care services that meet the unique needs of older Australians. They are also published and searchable on the My Aged Care Website **Find a Provider** tool, to help older Australians make informed choices when selecting aged care services. Verification is valid for 3 years from the date the verification is issued unless removed.

Service providers who wish to be considered for Specialisation Verification for an outlet, will need to apply manually. For more general information on the verification process and details on how to apply refer to the [Specialisation Verification for aged care services website page](#).

**!** Specialisation Verification may also be referred to as Diverse Needs in the Service and Support Portal.

Providers can only view and manage specialisations that were verified under the previous 2022 Specialisation Verification Framework in the Service and Support Portal.

From 1 November 2025, Specialisation Verification applications are assessed under the 2025 [Specialisation Verification Framework](#).

Upon transferring a service to a new outlet, any verified specialisations recorded against the service will be removed. The ability for outlet administrators to add/remove verified specialisations against that service will be controlled by the current verified specialisation in place at the new outlet.

The below image shows an outlet with no current verified diverse needs specialisations.

The screenshot displays the 'View outlet' page for Aussie Healthcare. The header includes the logo, '(Active) Outlet Id 1-14BSCW', and a 'DEACTIVATE OUTLET' button. The main content area is titled 'View outlet' and contains several sections: 'About Aussie Healthcare', 'Address' (1789 PARADISE AVENUE, TAMWORTH NSW 2340), 'Contact Details' (Name: Mike Wazowski, Phone: 02 9876 5432, Fax: 0268483977, Email: Aarush.Hurt@test.obenss.ela, Website: http://www.aussiehealthcare.com.au), 'Organisation philosophy' (Cultural specialisations, Religious specialisations), and 'Current Specialisation Verifications'. The 'Current Specialisation Verifications' section is highlighted with a red border and contains a message: 'There are no current verified diverse need specialisations to display.' Below this is a 'Changes to Specialisation Verification' notice and a 'MANAGE VERIFICATIONS' button. At the bottom, there is a 'VIEW SERVICE ITEMS' button.

To manage current verified specialisations for service items of an outlet, refer to Specialisation Verification in the [Adding and editing service attributes section](#).

## 2.2 Service Items

Providers will need to create and maintain information about the aged care services that their organisation provides (known as service items in the Service and Support Portal) in order to receive referrals through My Aged Care.

Service items in general include:

- Service sub-types, for non-Support at Home programs
- Services, for Support at Home
- Service types, which are groupings of Support at Home services
- Service groups, which are groupings of Support at Home service types.

It is important that information about services that are provided are kept up to date as the information is publicly displayed for prospective My Aged Care recipients and their support network on the service finder on the My Aged Care website ([www.myagedcare.gov.au](http://www.myagedcare.gov.au)), and used by My Aged Care contact centre staff and assessors to refer clients to service(s).

Services need to be linked to one or more of your outlets.

## 2.2.1 Adding a service item

When adding a Support at Home service item, the system will add a complete set of service items (which includes Service Groups, Service Types and Services).

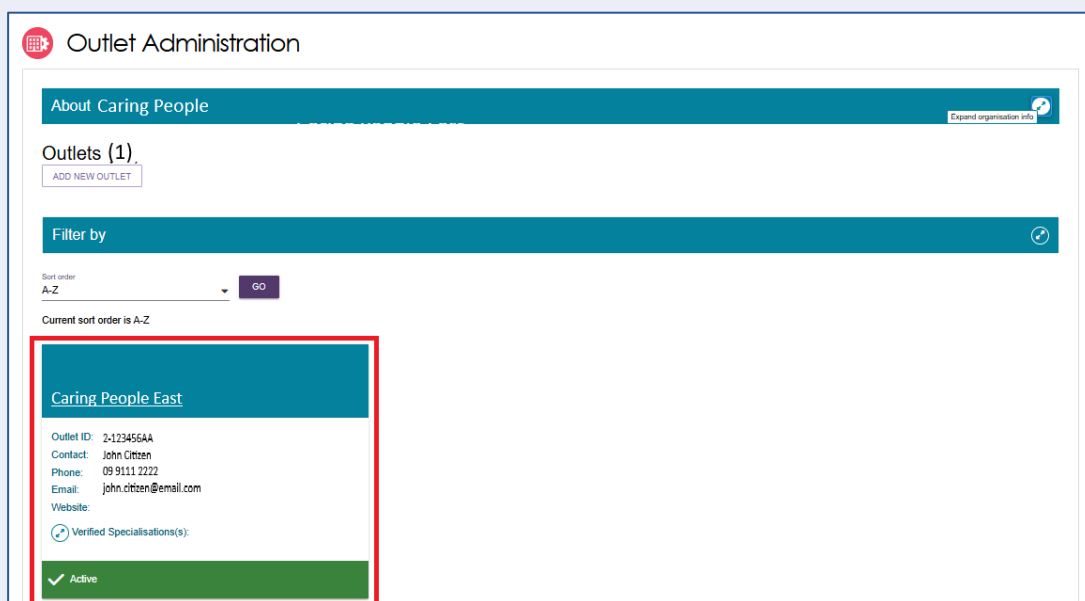

Normally there is no need to add more than one Support at Home service item for an outlet unless the organisation is offering Support at Home services in different manners from the same outlet.

Please contact the contact centre to discuss if you are considering adding more than one instance of Support at Home service items.

Follow these steps to add a service item:

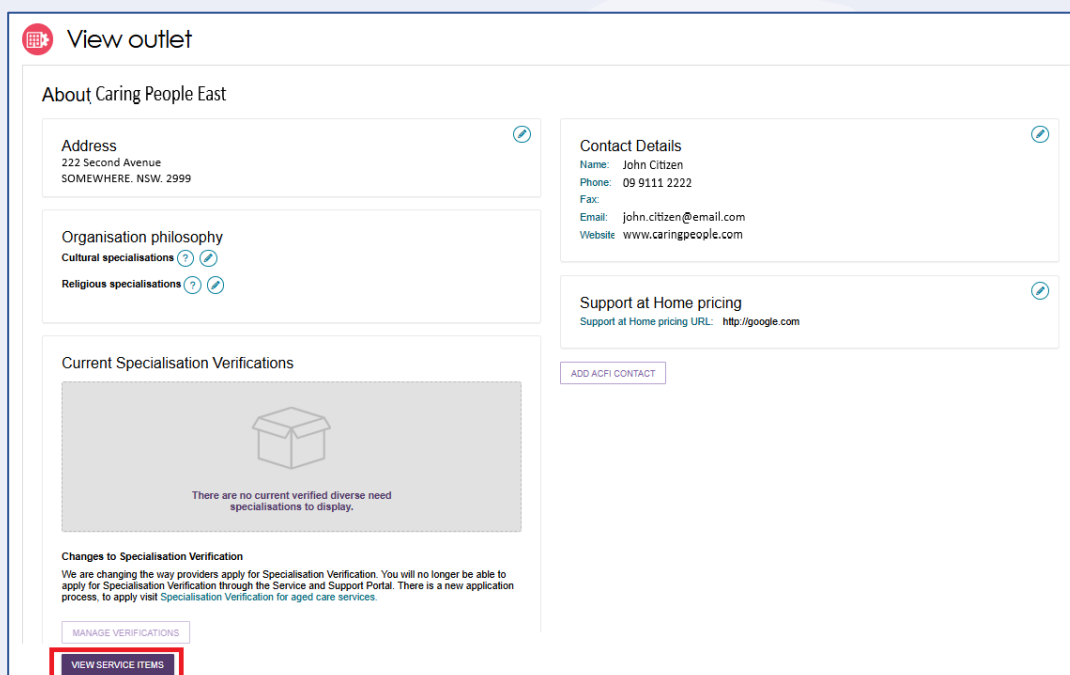

1. [From the Outlet administration page](#), select the name of the outlet on the outlet card that you want to add a service item to.

The **View Outlet** page then appears.

The screenshot shows the 'Outlet Administration' page. At the top, there is a header 'About Caring People' with an 'Expand organisation info' link. Below this, it says 'Outlets (1)' with an 'ADD NEW OUTLET' button. A 'Filter by' bar is present. Underneath, there is a 'Sort order' dropdown set to 'A-Z' and a 'GO' button. Below that, it says 'Current sort order is A-Z'. A red box highlights the 'Caring People East' outlet card, which displays the following information: Outlet ID: 2422456AA, Contact: John Citizen, Phone: 09 9111 2222, Email: john.citizen@email.com, Website: (empty), Verified Specialisations(s): (empty), and a green 'Active' status indicator.

2. From the **View outlet** page, select **VIEW SERVICE ITEMS**.

The screenshot shows the 'View outlet' page for 'Caring People East'. The page is divided into several sections: 'Address' (222 Second Avenue, SOMEWHERE, NSW, 2999), 'Contact Details' (Name: John Citizen, Phone: 09 9111 2222, Fax: (empty), Email: john.citizen@email.com, Website: www.caringpeople.com), 'Organisation philosophy' (Cultural specialisations, Religious specialisations), 'Support at Home pricing' (Support at Home pricing URL: http://google.com), and 'Current Specialisation Verifications' (There are no current verified diverse need specialisations to display). At the bottom, there is a 'MANAGE VERIFICATIONS' button and a red box highlighting the 'VIEW SERVICE ITEMS' button.

- From the View Service Items page, select the applicable Program tab.

The screenshot shows the 'View Service Items' interface. At the top, there are four tabs: 'Commonwealth Home Support Programme', 'Flexible Aged Care Programme', 'Residential Care', and 'Support at Home'. The first tab is highlighted with a red box. Below the tabs is a 'Filter by' section with dropdown menus for 'Status' (set to 'Operational') and 'Service availability'. There are buttons for 'ADVANCED SEARCH' and 'CLEAR FILTERS'. A message below the filters states: 'Status is Operational'. At the bottom, a message reads: 'There are no 'Operational' service items from this programme linked to this outlet. To view service items in other statuses, please adjust the filter.'

A list of the existing Service Items for that Program will be listed. The list will be filtered by the indicated criteria (e.g. Status of 'Operational' or 'Offline'). Other filters are available.

- Select the **ADD A SERVICE ITEM** button.

This screenshot is identical to the previous one, but the 'ADD A SERVICE ITEM' button in the top right corner is highlighted with a red box. The 'Status' dropdown menu is now set to 'Offline'.

- Select the Program for the service item that you wish to add.

The screenshot shows the 'Add service item' form. It includes a note: 'All fields marked with an asterisk (\*) are required.' Below this is a dropdown menu labeled 'Select the Programme that applies to this service item \*'. The dropdown is highlighted with a red box. A red error message below the dropdown reads: 'The Programme field is required.' At the bottom, there are 'SAVE' and 'CANCEL' buttons.

- If prompted, select **Funded or Non-funded** for the Service Item that you are adding.

This screenshot shows the 'Add service item' form with the 'Commonwealth Home Support Programme' selected in the dropdown. Below the dropdown, there are two radio button options: 'Funded' (which is selected) and 'Non-funded'. At the bottom, there are 'SAVE' and 'CANCEL' buttons.

for Support at Home service items this option is not available, as all Support at Home services must be Commonwealth government subsidised.

7. Select a **service inventory item** to associate with the service item to be added.

### Non-Support At Home Service Item Example

An example of a program where a longer list of possible service inventory items may be presented, and where filtering functionality may be used.

The screenshot shows the 'Add service item' form. It includes a dropdown for 'Programme' set to 'Commonwealth Home Support Programme'. Below are radio buttons for 'Funded' (selected) and 'Non-funded'. A 'Filter' button is visible. The table below lists two service inventory items:

### Support at Home example

An example of a program where a short list of possible service inventory items may be presented, and where no filtering functionality is available.

The screenshot shows the 'Add service item' form. The 'Programme' dropdown is set to 'Support at Home'. A table below lists one service inventory item, which is highlighted with a red box:

Programme	Service provider	Service item name	NAPS ID	Service type	Start date	End date

Below the table is a text input field for 'Service Item Name' with a red error message: 'Please specify Service Item Name'. 'SAVE' and 'CANCEL' buttons are at the bottom.

The service (inventory) item name will normally provide guidance as to which one to select.

Select the one that you want to add to your outlet by selecting the relevant service inventory item.

In the example above, you will also need to supply a unique service item name before clicking on the **SAVE** button (see step 8 below).

### 2.2.4 Editing service delivery area

Information about the areas you deliver Commonwealth-funded services in (referred to as service delivery areas in the Service and Support Portal) are pre-populated, based on your contractual information.

Service delivery areas can be edited for CHSP, Flexible Aged Care Program, and Residential Care service items. This functionality is not available for individual Home Support services. Changes apply to the entire Support at Home offering.

All providers (except residential care) must review their service delivery area information and edit if required.

It is important that you ensure the service delivery area(s) is accurate. This information is publicly displayed in the service finders, and impacts the referrals sent by contact centre staff and assessors.

### 2.2.7.1 Classifications

For Support at Home services, you can modify the Classification type for either Ongoing or Short-term for each service type. For example, you prefer to offer a particular service type on an ongoing support period basis only.

1. Navigate to the Support at Home service type that you want to edit the classification type for, by following the steps in [Editing a service item](#). Then, select Edit (Pencil) next to the Classification Type.

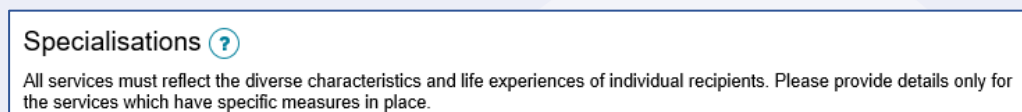

2. At the pop up, select Ongoing and/or Short-term and select **SAVE**.

### 2.2.7.2 Specialisations

Specialisations is an umbrella term for 3 sub-groups: Specialisation Verification, specialised services, and languages. Service providers of all care types can identify their ability to provide aged care services that cater to these specialisations.

### 2.2.7.3 Specialisation Verification

Specialisation successfully verified under the previous 2022 Specialisation Verification Framework may have been applied as an attribute of a service item by default where it was nominated in the Specialisation Verification application completed via the Service and Support Portal.

Once a specialisation is successfully verified, a service provider can choose to manually update the verified specialisation attribute for an outlet service item. At any time during the verification period, a service provider can select or deselect current verified specialisation attributes to indicate if an outlet service item provides that specialisation.

Only selected specialisations verified under the 2022 Specialisation Verification Framework will be made available to search in the **service finder** and **match and refer** tools.

All current verified specialisations under the 2022 and 2025 Specialisation Verification Frameworks **across all service items of the outlet** (regardless of attribute selection) are provided to the My Aged Care Website **Find a Provider** tool for publication through a separate manual process.

**!** In the Specialisations section, Specialisation Verification is displayed as Diverse Needs. Only current specialisations verified under the previous 2022 Specialisation Verification Framework will be available to update in the Service and Support Portal.

The below image shows the 'Aboriginal and/or Torres Strait Islander peoples and communities' Specialisation Verification program specialisation that can be applied to a particular outlet's service item. The other 8 specialisations are greyed out and thus not able to be applied.

## 2.2.7.11.4 Updating Pricing at the Service Level

! Service pricing at the Organisational level will be automatically applied to all service level pricing. Be aware of any Support at Home organisational pricing changes that the Organisational Administrator may do.

It is important to provide pricing at the service level to support My Aged Care website tools such as Find a Provider or Fee Estimator. There is flexibility to have service level availability and pricing by service delivery area (region).

At the service level, you can update pricing based on the unit type, for example: per hour, trip or meal for individual services. If you have entered pricing at the Organisation level this information can now be used to autofill, if the service level price does not already exist.

1. Select the Support at Home tab, then expand any service groups/service types, then select the Edit (Pencil) icon of the appropriate service card.

The example below shows the **Home Support** service group, **Meals** service type, and **Meal Delivery** service.

The screenshot shows the 'View Service Items' page for the 'Support at Home' program. The 'Support at Home' tab is selected and highlighted with a red box. Below the tabs, there is a 'Filter by' section with a 'Collapse filter' button. The main content area shows the 'Support at Home' service group with a status of 'Operational'. Underneath, there are several service categories: 'Assistive technology', 'Home modifications', 'Home support', 'Home maintenance and repairs', 'Home or community general respite', 'Meals', and 'Nutrition'. The 'Meals' category is expanded, showing two service cards: 'Meals Meal delivery' and 'Meals Meal preparation'. The 'Meal delivery' card is highlighted with a red box, and its 'Edit' (pencil) icon is also highlighted with a red box. The 'Meal preparation' card is also visible. Each service card shows 'Service availability' and 'Waitlist availability' with 'Yes' and 'No' buttons. The 'Meal delivery' card has 'Yes' selected for both. The 'Meal preparation' card has 'No' selected for both. The 'Home support' category has a 'Hide service types' button highlighted with a red box. The 'Home maintenance and repairs' category has a 'See services' button. The 'Home or community general respite' category has a 'See services' button. The 'Nutrition' category has a 'See services' button. The 'Status' section shows 'Operational' and 'Offline' buttons. The 'Classification type' section shows 'Ongoing' and 'Short-term' buttons. The 'Home or community general respite' category has a 'See services' button. The 'Meals' category has a 'Hide services' button. The 'Nutrition' category has a 'See services' button.

2. The **Edit Service sub-type** page appears. The appearance of the page will vary depending on which service you have selected.

#### Auto filling prices from the Organisation level

When you edit a Service's pricing, the system will autofill the common prices from the Organisation level. This will only happen when:

- if there is [price/s set at the Organisation level](#) (also referred as reference price) and
- when you select the delivery hours option/s you offer for the service.

When the pricing is auto filled, an information banner also appears.

**i** Pricing has been autofilled from organisation level. Please review and make changes if needed, and click save changes to confirm.

These prices are pre-filled for your convenience. You can keep this figure or apply a new price based on the delivery area, however you must ensure you **save** to apply the pricing data.

#### Entering prices at the Service level

4. **Checking Pricing completion**

Once you open the report, it will default to a sort order by Outlet and Operational service items and available services. This is intended to help you identify any missing pricing required to be entered.

A compliant Outlet is one where an Outlet is an **active** outlet with an **operational** Service item where a service/s availability = **yes** and common price – standard hours field **contains a price value**. The following sample report shows compliance, non-compliance and where compliance rule is not applicable.

2-2200G	The Simpsons Active	The Simpsons Springfield SAH	Operational	Shopping assistance	No	no	\$	-	\$	-	\$	-	-	-	-

- Row 1 indicates compliance with the rule.
- Row 2 with the red highlighted cell (under 'Common Price – Standard Hour' column) indicates the non-compliant price for that service. Note that the report will NOT highlight any non-compliant cells.
- Row 3 is not required to be assessed against the rule as the Service is not available. Any service item that is Offline is also not assessed against the rule as well as Inactive Outlets.

### 5. Price review/maintenance

Pricing must be reviewed and updated quarterly. This report can assist in providing a review of all the pricing entered and the last updated date. The last updated date is when any one of the service price time periods has been updated.

You will be able to identify if a service price has not been updated based on the last updated date. For example, if prices for the services have not changed in 3 or 6 months. This may indicate that it needs a review against your common prices for that service.
