

GP Non-Referred Attendances (GP NRA) per Patient Bulk Billing Ranges, 2024-25

(including temporary COVID-19 Vaccines items)

Many patients have more than one GP NRA service during the year. This page shows the proportion of patients who were always, usually, sometimes, or never bulk billed across **all** of their GP NRA services.

In 2024-25, the proportion of GP NRA patients who were always or usually bulk billed **increased from 72.4% to 72.5%** while the proportion of patients who were never bulk billed **increased from 13.6% to 13.6%**.

The proportion of patients always (100%) bulk billed tends to be lower than the bulk billing rate because patients with, for example, 9 out of 10 services (90%) bulk billed are classified as “usually” bulk billed.

GP Non-Referred Attendances – per Patient 100% Bulk Billing by PHN, 2024-25

(including temporary COVID-19 Vaccines items)

Many patients have more than one GP NRA service during the year. This page shows the proportion of patients who were always (100%) bulk billed across **all** of their GP NRA services in financial year 2024-25.

GP Non-Referred Attendances (GP NRA) per Patient Bulk Billing Ranges, 2024-25

(excluding temporary COVID-19 Vaccines items)

COVID-19 vaccine items were introduced in late February 2021 and had peak usage in the 2021-22 financial year. As bulk billing for COVID-19 vaccine items is mandatory, they impacted the bulk billing rate. This page shows the proportion of patients who were: always, usually, sometimes, or never bulk billed across their GP NRA services **excluding** COVID-19 vaccines.

In 2024-25, the proportion of GP NRA patients who were always or usually bulk billed **increased from 72.0% to 72.1%** while the proportion of patients who were never bulk billed **increased from 14.0% to 14.0%**.

The proportion of patients always (100%) bulk billed tends to be lower than the bulk billing rate because patients with, for example, 9 out of 10 services (90%) bulk billed are classified as “usually” bulk billed.
