REMINDER: Think before you click! This email originated from outside our organisation. Only click links or open attachments if you recognise the sender and know the content is safe.

Dear Contact Officer,

Palantir Technologies Australia have received the subject line REI through AusTender and are currently planning our REI response. We have one initial enquiry about the REI process:

1. Would the Department consider issuing a two (2) week extension to the REI closing date? This additional time would enable Respondents to prepare more comprehensive demo materials to address the large number of requirements contained in the SoR. We believe that this would provide the Department with a better understanding of available solutions and help to de-risk this critical project.

Thank you for your consideration.

Best Regards,

s47F

To Whom It May Concern,

I am reaching out on behalf of Palantir Technologies in response to the Request for Expressions of Interest for the Provision of the National One Stop Shop ICT Solution for Health and Medical Research. Firstly, I would like to extend our sincere apologies for the delay in our submission.

We understand that the submission is late and regret any inconvenience this may cause. Despite the delay, we are hopeful that the Department of Health and Aged Care will consider our submission and the potential of our technology in any future scoping discussions. We are confident that our technology can significantly contribute to advancing health and medical research in Australia.

I would also like to bring to your attention that our submission is incomplete, specifically Schedule 5 – Pricing Response template. In order to put forth the most comprehensive and competitive pricing for this opportunity, Palantir would like the opportunity to further scope and understand the problem sets and existing technical infrastructure. Please refer to our Covering Letter for additional information.

Thank you for considering our submission. We look forward to the opportunity to discuss how Palantir Technologies can support the National One Stop Shop ICT Solution for Health and Medical Research.

Best Regards,

Sydney NSW 2000

Dear Mr s47F

**RE: COMMONWEALTH REQUEST FOR EXPRESSION OF INTEREST (REI) -
Health/24/3268943**

Thank you for responding to our REI for the Provision of the National One Stop Shop ICT Solution for Health and Medical Research.

All submissions were thoroughly evaluated based on the criteria stated in the REI, and we commend the quality and innovation demonstrated in the submissions.

Following this assessment, the Department determined that while the proposals presented interesting concepts and partial solutions, the proposals did not sufficiently align with the full requirements to effectively streamline Health and Medical Research in Australia.

As a result, no submissions are being progressed to the planned second stage of the procurement process.

We sincerely thank all contributors for their time and expertise, and we look forward to continuing the dialogue and exploring future opportunities for collaboration.

A future opportunity is imminent as it is expected that the Department will re-approach the market with options for the provision of the National One Stop Shop and invite you to present an updated proposal. The department will provide further information to the market to assist you in preparing submissions that respond to the needs of the Australian health and medical research sector.

We hope that you will be interested in this opportunity.

If you would like feedback on your submission, please contact s47E(c), s47F Director, National One Stop Shop via s47E(d) health.gov.au to arrange a mutually convenient time for discussion.

Yours sincerely

s47F

Andrew Lalor

Dear s47E(

) Following Mr Lalor's letter dated 29th September 2025, we would like to arrange a feedback discussion on our REI submission for Health/24/3268943.

Given the upcoming re-approach to market, we would appreciate scheduling this debrief prior to the new opportunity being released.

Is there someone I can work with to schedule this?

Kind regards,

s47F

Dear Sir or Madam,

In reviewing RFI "RF/PH25/13765" (National One Stop Shop for health and medical research) and preparing our response, we have identified a couple of areas that require clarification.

We would appreciate your guidance on these points at your earliest convenience.

Best regards,

s47F

Part 5A - Solution Response Assessment Matrix	Definition of "Compliance" for Acceptance Criteria Could the DHDA provide a more granular explanation of how the compliance ratings (Yes, Partial, and No) for the acceptance criteria are defined? To provide accurate and meaningful responses, we need to understand your definitions better. For example, we'd like to understand: - Does a "Yes" rating require the functionality to exist as a standard feature today, or can it include capabilities the vendor commits to delivering in the future? - Conversely, does "No" mean the functionality is not currently available out-of-the-box, or does it mean the vendor will not commit to delivering it? - What does "Partial" stand for in this context?
Part 4 - Statement of Requirements - 3.2 Implementation Approach; Part 5B Solution Response Pricing	Timeline The Implementation Approach in Part 4, Section 3.2 states that implementation is anticipated to be 18 months from commencement of contract. Part 5B, however, describes three phases totaling 42 months. Could DHDA please clarify: - How these two timelines relate to each other? - Whether the pilot in Western Australia is intended to precede the commencement of contract or be included within the contract phase? - What the anticipated timeline and priority order for rolling out each of the remaining jurisdictions is?

Mr Louis Mosley
Head of Palantir UK
Palantir Technologies UK
s47F palantir.com

Dear Mr Mosley

Thank you for your correspondence of 11 March 2022 to the Minister for Health and Aged Care, the Hon Greg Hunt MP, concerning the possibility of a live demonstration of Palantir. The Minister has asked me to reply.

The Australian Government is committed to leveraging data as a national asset. The Australian Data Strategy <https://ausdatastrategy.pmc.gov.au/australian-data-strategy/executive-summary> signposts the Government's commitment to maximising the value of data, protecting the security of data and enabling data use for the benefit of individual Australians and the economy more broadly.

The Government has also invested \$130.8 million over three years from 2017 to build data integration and integrated data analysis capability through the Data Integration Partnership for Australia (DIPA) <https://www.pmc.gov.au/public-data/data-integration-partnership-australia/data-integration-partnership-australia-overview>.

I would like to commend Palantir's contribution to England's COVID-19 vaccine rollout, and the recognition it received.

The Department of Health has considered the Palantir's software and suggest that you stay abreast of open opportunities on AusTender <https://www.tenders.gov.au/> for demonstrating Palantir's capabilities in tackling Governmental challenges.

Yours sincerely
