

Australian Immunisation Register - Influenza Data - 1 March to 4 October

Notes and Caveats									
- All data is based on influenza vaccinations reported to the Australian Immunisation Register (AIR) as at COB 4 October 2026. - Data is from 1 March to 4 October for each encounter year. - Influenza vaccination data is not directly comparable across years due to a range of factors, including: - The impact of the COVID-19 pandemic and national and local responses to the pandemic over time - Early in the influenza season, the timing of seasonal events such as Easter - Timing of vaccines provided by pharmaceutical companies for clearance through the Therapeutic Goods Administration (TGA) - Supply of vaccines and commencement of flu season. - Vaccinations where the person has since been 'End dated' in the Medicare Consumer Directory (due to death, emigration, etc) are included in the data. - Data includes influenza vaccinations given to Medicare eligible and non-Medicare eligible individuals. - The counted values represent a count of all vaccination episodes. - A 'Vaccination episode' is linked to a State or Territory based on the vaccinated individual's Medicare residential address at the time of this report's creation. - The sum of state totals may not match the national total due to suppression rules introduced to protect the privacy of individuals
