1. The financial data underlying these datasets is extracted from the Aged Care Financial Report (ACFR) that were prepared by providers of residential aged care under the *Aged Care Act 1997*.

2. The Aged Care Act 1997 requires that residential aged care providers prepare Aged Care Financial Reports. The data above is extracted from submissions of the residential income statement and residential balance sheets as part of provider ACFRs. The comprehensiveness of the financial information contained in ACFRs is not audited, and as such varies from provider to provider. In addition, the accounting standards are subject to interpretation and it is possible that interpretations may differ between providers and between auditors. In addition, the Department's interpretation of the accounting data provided in the ACFRs has not been verified with the aged care providers.
