

Vaccine safety in Australia 2018

We actively monitor immunisation safety in Australia.

 **2,703** parents/carers responded to an SMS about their child's health a few days after their 12-month vaccinations

88% reported **no** adverse events

12% reported any adverse event, including ...

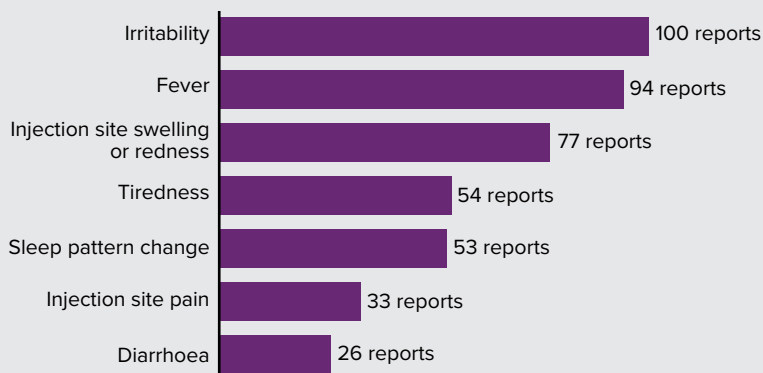

1.2%

who reported taking their child to a doctor or emergency department in the days after vaccination.

The adverse events they reported were similar to the types of adverse events reported overall.

317 parents/carers reported one or more adverse events. The most commonly reported were:

These symptoms are known to occur after vaccination. They are generally mild and short-lived.

These symptoms are also common in young children for other reasons (such as viral infection) and **may not be related to vaccination**.
