- This document has been released under the Freedom of Information Act 1982 by the Department of Health
- Medicare Benefits Schedule (MBS) items provide benefits for surgical terminations and consultations for the management of medical termination.
 - MBS benefits are payable for clinically relevant services but services must also comply with state and territory legislation in the state or territory in which the service is provided.
 - There are three MBS items which could be used to provide rebates for the surgical termination of pregnancy. Items 16530 and 16531 would mainly be claimed for the management of patients who have had a spontaneous abortion or miscarriage. Item 35643 may be claimed for an induced abortion but may also be used to evacuate the products of conception following miscarriage or after foetal death in utero.
