

PHIP INPUTS AND STATUS

The following documents the status of measures related to the COVID-19 Pandemic Health Intelligence Plan, as at 2 September 2020.

Key

- = Within threshold
- = Partially within threshold or Inadequate Data
- = Threshold exceeded/indicates it is not safe to proceed to next step of lifting restrictions.

MEASURE	STATUS
MODELLING OF COVID-19 IN AUSTRALIA	
Transmission potential	●
Outbreaks	●
Burden on the Healthcare system	●
PPE demand	●
Testing demand	●
Public Adherence	●
EPIDEMIOLOGICAL SITUATION	
Disease Incidence	●
Community Transmission	●
Priority populations	
Aboriginal and Torres Strait Islander peoples	●
People aged 65 years and over	●

MEASURE	STATUS
Outbreaks	
Community and Primary Care Surveillance	
Effectiveness of quarantine arrangements in managing COVID-19 importation risk	
Prioritised enhanced testing	Under development
HEALTH CARE SYSTEM CAPACITY	
Hospital System Capacity	
Health Consumables	
PPE	
Medicines	
Ventilators	
Testing and Laboratory Capacity	
Testing capacity to meet demand	
Availability of tests, extraction kits and swabs	
On-shore production of COVID-19 tests and extraction kits	
PUBLIC HEALTH SYSTEM CAPACITY	
Managing risk to disease control	
Timeliness of test notification systems	
Community exposure days	Under development
Time to case notification	

MEASURE	STATUS
Time to identify contacts	●
Time to notify contacts	●
Transmission risk	Under development
Capacity to manage risk of disease introduction to Australia	●
Workforce capacity	●
COVIDSafe App uptake and utility	●
COMMUNITY ACCEPTANCE AND ADHERENCE	
Public Acceptability	●
Public Adherence	●
MEDIUM TERM	
Sero-surveillance	Under development
Molecular Surveillance	Under development
