5. SPAP Recommendation

The SPAP recommended the change in product description for six variants to the current product range for Omnigon Flexima Uro Silk (SAS Code 9826E) listed in subgroup 3(b) of the SAS Schedule, at the unit price of \$6.373, with a maximum monthly quantity of 30 units.

6. Context for Decision

The SPAP helps decide whether stoma products should be subsidised and, if so, the conditions of their subsidisation in Australia. It considers submissions in this context. An SPAP decision not to recommend listing or changes to a listing does not represent a final SPAP view about the merits of a particular stoma product. A company can resubmit to the SPAP following a decision not to recommend listing or changes to a listing. The SPAP is an advisory committee and as such its recommendations are non-binding on Government. All SPAP recommendations are subject to Cabinet/Ministerial approval.

7. Applicant's Comment

Omnigon agrees with the SPAP's recommendation.
