

# COVID-19 outbreaks in Australian residential aged care facilities

## National snapshot

**Table 1:** Aged Care COVID-19 data as at 0800 on 13 November 2020

Active outbreaks	1 <sup>1</sup>
Active resident cases	0
Active staff cases	0
Deaths	678
Total number of residential aged care facilities that have had an outbreak	216
Total number of outbreaks at residential aged care facilities	222
Number of residential aged care facilities with resolved outbreaks	215 (221 outbreaks closed) <sup>2</sup>
Number of residential aged care facilities with only one case (resident or staff member) of COVID-19	95
Total resident cases	2027 <sup>3</sup>
Resolved resident cases	1349
Total staff cases	2231 <sup>3</sup>
Resolved staff cases	2231

<sup>1</sup> One facility has an active outbreak but does not have any active cases. This facility is in a period of enhanced surveillance, which typically lasts 14 days.

<sup>2</sup> Some residential aged care facilities have had more than one outbreak.

<sup>3</sup> Case numbers may increase/decrease without a change to active case numbers when historical records are reclassified or added.

## Analysis

### Current situation in Australia

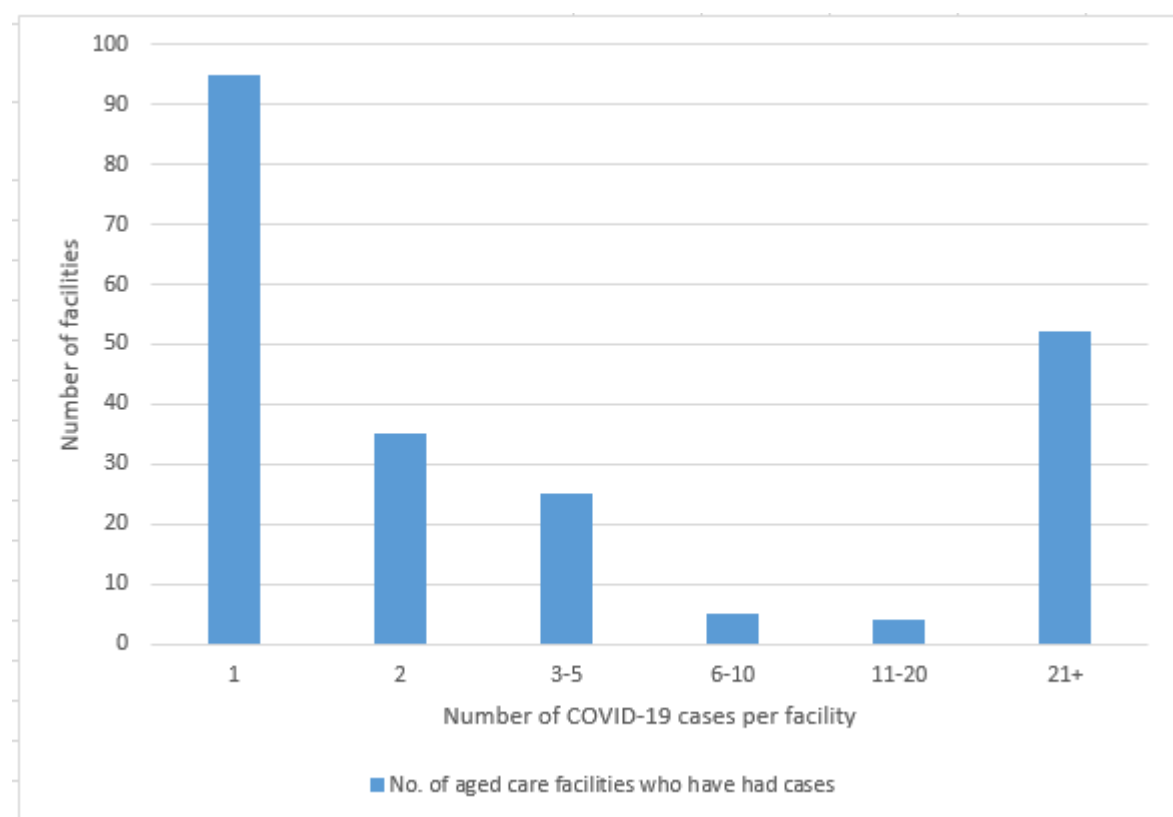

In Australia, a total of 27,698 cases of COVID-19 have been reported, including 74 active cases and 907 deaths.

- Of these, a total of 20,345 cases of COVID-19 have been reported in Victoria, including 3 active cases and 819 deaths.

As at 13 November 2020, there are no active cases in residential aged care recipients or aged care staff. The last new active case of COVID-19 in a residential aged care recipient was on 26 September 2020. There have been no new active cases of COVID-19 in aged care recipients since 28 October 2020. There have been no new active cases of COVID-19 in aged care workers since 5 November 2020.

There is one residential aged care facilities in Victoria currently classified as having an active COVID-19 outbreak. There are no active cases. Outbreaks at facilities with no active cases remain classified as 'active' for a period of enhanced surveillance, which typically lasts for around 14 days. The classification of an outbreak is changed to 'resolved' at the discretion of the Public Health Unit.

**Figure 1:** Distribution of Australian residential aged care facilities by total number of cases of COVID-19 (includes staff and resident cases)

Of the 216 residential aged care facilities that have had a case(s) of COVID-19, 95 facilities (44 per cent) have had a single case of COVID-19.

**Figure 2: Number of new confirmed COVID-19 cases in Victoria RACFs and Victorian total cases, as at 12 November 2020**

Source: Victorian Aged Care Response Centre (VACRC)

*Noting that 'other' refers to individuals associated with an outbreak in aged care who are neither residents nor staff. This category is not reported on in this report.*

### **National comparison of 2020 residential aged care deaths with previous year and influenza comparisons**

Across the 2020 calendar year to 31 July, the total number of people who have passed away in residential aged care is 32,398. The lower number of deaths in 2020 in the data available to date (32,398) compared to the same point in 2019 (33,383) is likely the result of increased influenza immunisation rates, and increased infection control protocols introduced during the COVID-19 pandemic.

Sadly influenza kills many elderly Australians each year many of whom live in aged care facilities.

Influenza is an important issue in residential care. Residents, particularly the elderly, are often vulnerable to influenza due to co-morbidities and/or advanced age, and the environment of communal living facilitates the spread of respiratory agents<sup>4</sup>.

The official 2020 influenza season commenced on 1 May 2020 and concluded on 31 October 2020.

<sup>4</sup> Reference: [Guidelines for the Prevention, Control and Public Health Management of Influenza Outbreaks in Residential Care Facilities in Australia](#)

Notification data for influenza by accommodation setting is not reported to the National Notifiable Disease Surveillance System (NNDSS).

The following data represents persons aged 65 and over for all accommodation settings. In the period 1 January to the end of the influenza season on 31 October for each year<sup>5,6</sup>

- The 2017 influenza season recorded the highest levels of influenza activity since 2009 swine flu pandemic with over 1,044 older Australians dying from influenza.
- In 2018, 83 older Australians died from influenza.
- In 2019, 832 older Australians died from influenza.
- In 2020, 28 older Australians have died from influenza.

### **International comparisons**

During the COVID-19 pandemic, no country has been able to avoid outbreaks or deaths in residential aged care when there has been widespread community transmission.

The Australian death rate is 0.37 per cent (3.7 in 1,000) against the total number of residential aged care beds across the country, and predominantly limited to recent tragic events in Victoria.

As at 12 November 2020, Canada has experienced 10,578 deaths from COVID-19, with 8,057 (or 76 per cent) of these in care homes.

---

<sup>5</sup> The data provided were extracted from the NNDSS on 5 November 2020. Due to the dynamic nature of the NNDSS, data in this extract is subject to retrospective revision and may vary from data reported in published NNDSS reports and reports of notification data by states and territories.

<sup>6</sup> The number of influenza-associated deaths reported to the NNDSS does not represent the true mortality associated with this disease. Reporting of an outcome of infection is not a requirement of notification and comparisons may not be reliable due to difference in methodologies between jurisdictions over time.

## Workforce in active residential aged care outbreaks

As part of the aged care response, significant surge workforce assistance has been provided including by both State and National Aged Care Emergency Response (NACER) teams, with many workers deployed from interstate. The number of Commonwealth funded surge staff that have been deployed to Victorian aged care services exceeds 2,000.

**Table 2:** Workforce resources supplied to residential aged care facilities

Agency	Resources Supplied (as at 8 November 2020)
<b>State and NACER (National Aged Care Emergency Response) Teams</b>	Tasmanian Government: 7 clinical and 2 support staff. Western Australian Government: 19 clinical personnel and 4 support staff. South Australian Government: 18 clinical personnel and 4 support staff. 12 NACER teams (70 personnel) have been deployed. The deployment of State and NACER teams is now complete.
<b>AUSMAT</b>	Completed 174 visits to 80 aged care facilities.
<b>Australian Defence Force</b>	Have visited 593 facilities conducting clinical screens, and conducted a total number of 679 preventative support visits.
<b>Recruitment, Consulting, and Staffing Association (RCSA)</b>	Staff supplied to fill 24,746 shifts.
<b>Healthcare Australia</b>	Staff supplied filled 5,192 shifts for workforce surge and 2,295 shifts for NACER teams.
<b>Mable</b>	Supplied 130 staff to fill 2,711 shifts.
<b>Aspen Medical</b>	Supplied staff to fill 658 roles including clinical first responders.
<b>Health X</b>	Supplied 37 staff to fill 1,054 shifts.
<b>Torrens Health</b>	Supplied staff to fill 821 shifts.
<b>Western Health</b>	Visited 37 facilities to provide assistance. Agency is continuing to provide support to one aged care facility.
<b>Residential Aged Care Assistants (RACA)</b>	Supplied 54 RACAs to six facilities that have completed 832 shifts.
<b>Residential Aged Care Safety Observers (RACSO)</b>	Supplied 47 RACSOs to 18 facilities that have completed 1,346 shifts.
<b>Residential Aged Care Visitation Assistant (RACVA)</b>	Supplied 56 RACVAs to 23 residential aged care facilities.

## Provision of personal protective equipment (PPE)

A range of resources and online training on the use of PPE is available on the Department's website for aged care workers.

Since March 2020, the Commonwealth Government has been working with state and territory governments to ensure aged care facilities have sufficient PPE. PPE is dispatched both directly from the National Medical Stockpile (NMS) and by jurisdictions on the NMS' behalf, depending on the specific circumstances.

Over half a billion masks and approximately 53 million gowns, 161 million gloves, and 44 million goggles/face shields have been ordered for staggered delivery into the NMS through to January 2021.

As at 12 November 2020, the NMS has provided aged care facilities with approximately:

- 19 million masks
- 5 million gowns
- 11 million gloves
- 4 million goggles and face shields
- 90,000 bottles of hand sanitiser
- 165,000 clinical waste bags.

## Testing of aged care residents and staff

The Australian Government has engaged Sonic Healthcare to provide a dedicated pathology service for the testing of suspected cases of COVID-19 in residential aged care facilities. The service is intended to supplement existing public health pathology services in aged care through the provision of services from the private sector as required.

As at 3 November, Sonic Healthcare has conducted 207,692 COVID-19 tests at 2,082 unique residential aged care facilities nationally. This includes 182,694 COVID-19 tests at 599 unique residential aged care facilities in Victoria.

Testing regimens for residents and staff at aged care facilities that experience a COVID-19 outbreak is based on advice from the relevant Public Health Unit.

To help the sector to drive down case numbers, the Australian Government has expanded capacity for testing of asymptomatic aged care workers in Victoria. Workers in residential aged care facilities will be tested fortnightly in metropolitan Melbourne, and monthly in regional Victoria.

Between 19 October 2020 and 8 November 2020, coordinated asymptomatic testing was conducted at 688 aged care facilities, which included 16,690 tests.

## Infection control and audits

The Aged Care Quality and Safety Commission (Commission) commenced additional Infection Control Monitoring visits in Victoria from 3 August 2020 in response to the increasing risk of COVID-19 outbreaks in residential aged care services, following significant community transmission of COVID-19 in Victoria.

The purpose of the visit is to observe infection control practices, to ensure that staff, management and visitors are adhering to safe personal protective equipment protocols and to safe infection control arrangements as required under the quality standards.

The Commission has extended the infection control monitoring program rolled out in Victoria, into other jurisdictions, working in partnership with local health authorities. This program is in addition to the Commission's usual assessment and auditing program, and includes spot checks to residential aged care services, without an outbreak, to check compliance with PPE and infection control arrangements. This program in Victoria has been complemented by compliance checks to 593 residential aged care facilities by Australian Defence Force (ADF) personnel, and 37 facilities by Western Health personnel.

From 1 March 2020, the Commission has undertaken 1,598 visits nationally relating to infection control, including spot checks and 2,064 unannounced visits and announced/short notice visits.

All residential aged care facilities will be required to engage an onsite clinical lead to provide leadership and increase capacity in relation to infection prevention and control. The Australian Government is providing a second payment of the COVID-19 supplement to assist facilities in meeting the additional costs of preparing for and responding to COVID-19.

In addition, under the Commonwealth-State Plan to boost aged care preparedness, states and territories are complementing the activity being undertaken by the Commission through additional site visits by state health services at the local level, which includes work relating to infection prevention and control (see Table 3 below). These visits are strengthening state health service relationships with local aged care services as part of the standing up of joint health aged care emergency response centres in each jurisdiction.

**Table 3 - Total Quality Assessment and Monitoring Activities with residential services (including IPC), by type and month – to 12 November 2020**

Regulatory Activities	Mar-20	Apr- 20	May-20	Jun-20	Jul- 20	Aug-20	Sep-20	Oct-20	Nov-20*	Total
Site visits	97	12	94	115	132	329	580	485	117	1,961
Non-site activities	3,138	419	80	69	1,400	2,766	407	303	75	8,657
Total activities	3,235	431	174	184	1,532	3,095	987	788	192	10,618

<sup>7</sup> In Victoria, a death is reported when a person with COVID-19 dies during an active outbreak at an aged care facility, irrespective of the cause of death.

<sup>8</sup> In respect to Newmarch House, the 19 includes the deaths of two residents who had COVID-19 but were considered to have passed away from other causes.
