

## Vaccine safety in Australia 2019

We actively monitor immunisation safety in Australia.

 **8,746** parents/carers responded to an SMS about their child's health a few days after their 4-year vaccinations.

who reported taking their child to a doctor or emergency department in the days after vaccination.

The adverse events they reported were similar to the types of adverse events reported overall.

**1,673** parents/carers reported one or more adverse events. The most commonly reported were:

These symptoms are known to occur after vaccination. They are generally mild and short-lived.

These symptoms are also common in young children for other reasons (such as viral infection) and **may not be related to vaccination.**

## Vaccines given at 4 years in 2019

**Infanrix IPV or Quadracel**

**Protects against**

Diphtheria, tetanus, whooping cough, polio
