

# COVID-19 outbreaks in Australian residential aged care facilities

## National snapshot

As at 8:00am on 14 January 2021 there are no active cases of COVID-19 related to aged care.

**Table 1: Aged Care COVID-19 data as at 0800 on 14 January 2021**

Active outbreaks	0
Active resident cases	0
Active staff cases	0
Deaths	678
Total number of residential aged care facilities that have had an outbreak	218
Total number of outbreaks at residential aged care facilities	224
Number of residential aged care facilities with resolved outbreaks	218 (224 outbreaks closed) <sup>1</sup>
Number of residential aged care facilities with only one case (resident or staff member) of COVID-19	96
Total resident cases	2027
Recovered resident cases	1349
Total staff cases	2238
Recovered staff cases	2238

---

<sup>1</sup> Some residential aged care facilities have had more than one outbreak.

## Analysis

### Current situation in Australia

In Australia, a total of 28, 658 cases of COVID-19 have been reported, including 2756 active cases and 909 deaths.

On 17 December 2020, new COVID-19 cases were reported in a new cluster in Avalon, New South Wales. On 30 December 2020, new cases were reported in a new cluster in Black Rock, Victoria. On 7 January 2021, a positive case of the UK strain of COVID-19 was detected in a quarantine hotel employee in Queensland. This resulted in additional requirements to aged care services announced through Aged Care Direction (No. 18). There were no cases linked to this cluster.

As at 15 January 2021, there are no active cases of COVID-19 in a staff member in a Commonwealth funded aged care service.

As at 8:00am on 14 January 2021, there are no active cases in residential aged care recipients. The last new active case of COVID-19 in a residential aged care recipient was identified on 26 September 2020.

There have been no active cases of COVID-19 in aged care recipients since 28 October 2020.

**Figure 1: Distribution of Australian residential aged care facilities by total number of cases of COVID-19 (includes staff and resident cases)**

Of the 218 residential aged care facilities that have had a case(s) of COVID-19, 96 facilities (44 per cent) have had a single case of COVID-19.

### International comparisons

During the COVID-19 pandemic, no country has been able to avoid outbreaks or deaths in

residential aged care when there has been widespread community transmission.

The Australian death rate is 0.37 per cent (3.7 in 1,000) against the total number of residential aged care beds across the country.

By comparison, Canada has experienced more than 17 times the number of deaths in care homes, than Australia.

### Workforce in active residential aged care outbreaks

As part of the aged care response, significant surge workforce assistance has been provided including by both State and National Aged Care Emergency Response (NACER) teams, with many workers deployed from interstate.

**Table 2: Workforce resources supplied to residential aged care facilities**

Agency	Resources Supplied (as at 10 January 2021)
State and NACER (National Aged Care Emergency Response) Teams	Tasmanian Government: 7 clinical and 2 support staff. Western Australian Government: 19 clinical personnel and 4 support staff. South Australian Government: 18 clinical personnel and 4 support staff. 12 NACER teams (70 personnel) have been deployed. The deployment of State and NACER teams is now complete.
AUSMAT	Completed 174 visits to 80 aged care facilities.
Australian Defence Force	Have visited 593 facilities conducting clinical screens, and conducted a total number of 679 preventative support visits.
Recruitment, Consulting, and Staffing Association (RCSA)	Staff supplied to fill 24,746 shifts.
Healthcare Australia	Staff supplied filled 5,249 shifts for workforce surge and 2,295 shifts for NACER teams.
Mable	Supplied 130 staff to fill 2,711 shifts.
Aspen Medical	Supplied 268 staff to fill 700 roles including clinical first responders.
Health X	Supplied 40 staff to fill 1,318 shifts.
Torrens Health	Supplied 1,208 shifts in surge workforce roles and 1,270 shifts as Residential Aged Care visitation Assistants (RACVAs).
Western Health	Visited 37 facilities to provide assistance. Agency is

Agency	Resources Supplied (as at 10 January 2021)
	continuing to provide support to one aged care facility.
Residential Aged Care Assistants (RACA)	Supplied 54 RACAs to six facilities that have completed 832 shifts.
Residential Aged Care Safety Observers (RACSO)	Supplied 47 RACSOs to 18 facilities that have completed 1,346 shifts.
Residential Aged Care Visitation Assistant (RACVA)	RACVAs completed 1,205 shifts.

### **Provision of personal protective equipment (PPE)**

A range of resources and online training on the use of PPE is available on the Department's website for aged care workers.

Since March 2020, the Commonwealth Government has been working with state and territory governments to ensure aged care facilities have sufficient PPE. PPE is dispatched both directly from the National Medical Stockpile (NMS) and by jurisdictions on the NMS' behalf, depending on the specific circumstances.

Over half a billion masks and approximately 53 million gowns, 164 million gloves, and 44 million goggles/face shields have been ordered for staggered delivery into the NMS through to 2021.

As at 12 January 2021, the NMS has provided aged care facilities with approximately:

- 20 million masks
- 5 million gowns
- 11 million gloves
- 4 million goggles and face shields
- 90,000 bottles of hand sanitiser
- 165,000 clinical waste bags.

In response to recent COVID-19 cases reported in the Northern Beaches Local Government Area (LGA), the Australian Government is ensuring residential aged care facilities in the area have sufficient stocks of PPE and dispatching to facilities where needed.

### **Testing of aged care residents and staff**

The Australian Government has engaged Sonic Healthcare to provide a dedicated pathology service for the testing of suspected cases of COVID-19 in residential aged care facilities. The service is intended to supplement existing public health pathology services in aged care through the provision of services from the private sector as required.

As at 5 January 2021, Sonic Healthcare has conducted 271,782 COVID-19 tests at 2,298 unique residential aged care facilities nationally. This includes 228,994 COVID-19 tests at 714 unique residential aged care facilities in Victoria.

Testing regimens for residents and staff at aged care facilities that experience a COVID-19 outbreak is based on advice from the relevant Public Health Unit.

To help the sector to drive down case numbers, the Australian Government has expanded capacity for testing of asymptomatic aged care workers in Victoria. Workers in residential

aged care facilities are being tested fortnightly in metropolitan Melbourne, and monthly in regional Victoria. Since 19 October 2020, 3,219 coordinated asymptomatic testing visits have been conducted, and 64,477 tests conducted at aged care facilities in Victoria.

In response to the increase in new cases of COVID-19 in New South Wales, the Australian Government commenced asymptomatic testing in residential aged care facilities in the Northern Beaches area. All 31 residential aged care facilities in the Northern Beaches elected to participate in asymptomatic testing. As at 28 December 2020, this testing was complete, testing 2,154 residents in 31 facilities, with all test results negative.

Testing for RACFs in the Inner West commenced on 2 January 2021. To date, 58 of the 89 sites have been tested, with a total of 1,681 residents and 1,324 staff. Results from 46 sites have returned negative with results from twelve sites pending.

The Department has requested that Sonic offer delivery of pre-prepared COVID-19 collection kits to the remaining facilities with a training video with collections to be undertaken by an onsite nurse and specimens collected and tested by Sonic.

The service is intended to supplement existing public health pathology services in aged care through the provision of services from the private sector as required.

### **Infection control and audits**

The Aged Care Quality and Safety Commission (Commission) is conducting an ongoing infection control monitoring program in all Australian jurisdictions, working in partnership with local health authorities. This program is in addition to the Commission's usual assessment and auditing program, and includes spot checks to residential aged care services, without an outbreak, to check compliance with PPE and infection control arrangements.

The purpose of the visit is to observe infection control practices, to ensure that staff, management and visitors are adhering to safe personal protective equipment protocols and to safe infection control arrangements as required under the quality standards.

Between 1 March 2020 and 14 January 2021, the Commission undertook 2,315 visits nationally relating to infection control, including 2,122 spot checks and 2,820 unannounced visits and announced/short notice visits. This includes recent infection control monitoring spot checks in residential aged care facilities in New South Wales, including the Northern Beaches.

All residential aged care facilities are required to engage an onsite clinical lead to provide leadership and increase capacity in relation to infection prevention and control. The Australian Government is providing a second payment of the COVID-19 supplement to assist facilities in meeting the additional costs of preparing for and responding to COVID-19.

In addition, under the Commonwealth-State Plan to boost aged care preparedness, states and territories are complementing the activity being undertaken by the Commission through additional site visits by state health services at the local level, which includes work relating to infection prevention and control (see Table 3 below). These visits are strengthening state health service relationships with local aged care services as part of the standing up of joint health aged care emergency response centres in each jurisdiction.

The Australian Government is working collaboratively with the states and territories to further bolster infection prevention and control through high quality face-to-face training in the aged care sector. In particular, the Government has committed \$57.8 million to fund states and territories to deploy accredited infection prevention and control (IPC) experts into residential aged care facilities to provide training, and assist with the refinement of outbreak

management plans where needed.

Table 3: Total Quality Assessment and Monitoring Activities with residential services (including IPC), by type and month 1 March – to 14 January 2021

Regulatory Activities	Mar-20	Apr-20	May-20	Jun-20	Jul-20	Aug-20	Sep-20	Oct-20	Nov-20	Dec-20	Jan-21	Total

<sup>2</sup> In Victoria, a death is reported when a person with COVID-19 dies during an active outbreak at an aged care facility, irrespective of the cause of death.

<sup>3</sup> The 19 deaths at Newmarch House includes the deaths of two residents who had COVID-19 but were considered to have passed away from other causes.
